For the Year Ended December 31
1927

POPULATION: Census 1920, 22,779

FREE PRESS PRINTING CO., BURLINGTON, VT.

RESOLUTION

Resolution relating to the publication of the Sixty-third Annual City Report, adopted at a meeting of the Board of Aldermen, held on the 6th day of January, 1928.

CITY OF BURLINGTON

In the year one thousand nine hundred and twenty-eight.

Resolved, By the Board of Aldermen of the City of Burlington, as follows:

That the City Clerk is hereby directed to prepare for publication the Annual Reports of the City Officers for the year 1927 and such other matter as is usually published in the City Reports, and under the direction of the Mayor, to procure printed Sixteen Hundred (1,600) copies thereof, for taxpayers and general distribution, and that said copies be printed and ready for distribution at least two weeks before the Annual City Election. That bids for the printing and binding of above said report be asked for by the Board of Finance.

Approved January 10, 1928.

CLARENCE H. BEECHER, M. D., Mayor.

MAYOR'S MESSAGE

To the Honorable Board of Aldermen of the City of Burlington, Vt.:

GENTLEMEN:—The charter provision that the Mayor "shall recommend to the consideration of the Board of Aldermen whatever measures he may deem necessary for the prudent and efficient management of the affairs of the city," has by custom taken the form of a "message" at the beginning of the term. Where the term is a continuation in office of the previous incumbent there is less need or use of such a message, as the "measures" are likely to be fairly well known by the Board. Consequently, I shall not take this occasion to rehearse my views on all the problems which may at some time be at issue, but, only on those which seem to be necessary now.

A revision of the Building Ordinances has been under consideration for some time and should be soon completed. It should be flexible enough to be sensible, but not too much should be left to the judgment of those who have its provisions to enforce so as to make contention about the essentials.

Some of the recommendations of the Committee on insurance who put in much time in study of our insurance problems should be adopted, particularly those which would tend to economies.

Traffic problems, both of the movement of vehicles and their parking, need increased attention. There are some streets which could well be designated "through streets" and the traffic on streets intersecting with them brought to a stop before entering these "through streets." Added signals and signs will help, and increasing the traffic squad of the police force will be of benefit. We must enforce strictly the motor vehicle law to help in reducing the number of accidents. On Church and other busy streets it may be necessary to stop pedestrians crossing excepting at the designated cross walks. The parking for out of town cars would be very materially increased if the business men and their help did not occupy so much of the available space through the business hours. It may be necessary to restrict the length of time parking will be allowed in the rest of the retail district as is now done on Church Street.

The Park Department should have more money, this and succeed-

ing years for trimming the trees. We cannot afford to neglect this asset of our City. The development of South Park, particularly of the Athletic Field, should be promoted, this will provide the needed facilities for the High Schools and during the vacation period for other teams.

There should be fewer special appropriations from the Incidental Funds. Each department should be responsible for all its activities and the cost chargeable to it.

An aviation field should be secured. A field which we can control and which is otherwise desirable may now be secured. If investigation shows that the expense of making the necessary improvements is not too great, we should take advantage of the offer of the University of Vermont of the field in South Burlington. It is well located, level, well drained, and of sandy soil, all desirable features.

The building program is well under way and will occupy much of our time and thought so that we may secure for the city adequate return for the money spent. While some adjustments are necessary as the work progresses these should be only those which secure better return on the expenditures.

In view of the ever recurring discussion of taxation, I commend to your attention an excerpt from the Mayor's message in 1869, when it seemed likely that the tax rate would be increased to one dollar:

"The heavy burden of taxation, State and National, as well as City, under which our people are now laboring, makes it an imperative duty for us to do all we can to keep our municipal expenses down to the lowest point possible, consistent with true economy. At the same time in a growing city like ours, where individual enterprise is doing so much to develop the resources and increase the business, as well as the educational and social standing of our community, it is our duty to encourage and cooperate in all progressive movements which will tend to make our City a desirable place for residence or business."

As I review the work of the preceding two years, I am impressed with the harmony that has prevailed between your Board and the Mayor, and realize that without that cooperation little progress would have resulted. I trust our cordial relations may continue.

C. H. BEECHER,

Mayor.

REPORT OF THE BOARD OF LIBRARY COMMISSIONERS

OF THE

FLETCHER FREE LIBRARY

To the Honorable City Council of Burlington, Vt.:

The Board of Library Commissioners of the Fletcher Free Library respectfully submits the following report for the year ending December 31, 1927:

FINANCIAL STATEMENT

RECEIPTS

Appropriation	\$9,000 00
Interest	555 63
	\$9,555 63

DISBURSEMENTS

Salaries	\$5,938 95
Lighting	137 18
Telephone	65 43
Fuel	370 75
Postage	21 50
Insurance	174 40
Printing	11 35
Water tax	8 17
Laundry	10 60
Repairs on building and renewal of equipment.....	1,015 47
Supplies	116 27
Unexpended balance	1,685 56
	\$9,555 63

For other Library statistics, and for an account of the activities of the year we would refer you to the Librarian's report.

The building and its equipment have been improved by the erection of a porch over the side entrance to the library, and an oil-heating system has been installed which bids fair to be a desirable change from the old method of heating the building. As previously stated, there is still urgent need that an appropriation be made for another tier of steel shelving for the stack room to relieve the congestion in other parts of the building.

Respectfully submitted,

HENRY L. WARD,

D. A. LOOMIS,

LYMAN C. HUNT,

Commissioners.

REPORT OF THE TRUSTEES
OF THE
FLETCHER FREE LIBRARY

Burlington, Vt., January 10, 1928.

To the Honorable City Council of the City of Burlington:

In behalf of the Trustees of the Fletcher Free Library, I have the honor to present for your consideration the annual report of the work accomplished during the past year and to assure you that every effort has been faithfully made to administer the library in such a way that we hope the public will feel its mission in the community is being fulfilled.

Unless one keeps in touch with the library, it is impossible to appreciate the amount and the quality of work done by our efficient Librarian, Mr. George Dana Smith, and his staff of helpers. It is because of their good work that the library so well serves the public and makes applicable to it the words of a long-ago author:

"Certainly there is nothing which renders a library more commendable than when every man finds in it that which he is in search of and could no where else encounter."

Gabriel Naude, interpreted by John Evelyn, 1661.

Out of town visitors have been loud in their praise of the resources of the Fletcher Free Library and the ready help received at its desk.

The report of the Librarian, appended hereto, to which attention is invited for careful reading, contains the statistics for the year 1927, including those of general administration, accessions, circulation, attendance, etc. It shows that the Library continues to perform services of a high educational value to the general public and to provide resources of increasing importance to all who depend upon it for their needs.

In a recent article by Charles F. D. Belden, this paragraph is found which voices the sentiment of those most intimately acquainted with library work:

"The public library in the United States—is only beginning to realize its possibilities. If only some benefactor would come along and say, 'Here are unlimited funds, use them as your judgment dictates,' a large library could develop a system of public service that would astound the nation, for there is no limit to the benefits which a public library, adequately supported, can render to the community which it serves through—the books upon its shelves."

The Trustees, upon whom rests the responsibility to the community for the accomplishment of the purposes for which the library exists, express in this public fashion their appreciation to patrons who think it worth while to voice gratitude for benefits received, and to the Librarian and his staff for untiring work and steady application to duty.

Respectfully submitted,

MARGARET CHESTNUT BUELL,

Secretary.

REPORT OF THE LIBRARIAN

OF THE

FLETCHER FREE LIBRARY

The annual report of the Librarian for the year ending December 31, 1927, the fifty-fourth since the opening of the Library and the twentieth given by the present Librarian is respectfully submitted.

The year has been as a whole one of progress in supplying the varied demands made upon the resources of the library. The volume of work has been unusually large, although the circulation has been subject to fluctuation, doubtless the result of outside conditions. Some months have shown an increase in circulation, while others have shown a corresponding decrease without apparent cause. The loan approximately of one hundred thousand books annually is a trustworthy indication of the continued usefulness of the library to the community.

Number of days open.....	303
Number of books issued for outside use.....	99,777
Number of pictures issued for outside use.....	865
Largest daily issue, November 19.....	631
Smallest daily issue, June 2.....	130
Average daily issue.....	329
Percentage of non-fiction circulated.....	38 $\frac{3}{4}$
Percentage of fiction circulated.....	61 $\frac{1}{4}$
Books issued per capita.....	3 $\frac{8}{26}$

The circulation by classes compared with that of 1926 is given in a supplementary table at the end of this report.

ADDITIONS AND CATALOGING

Received by purchase.....	929 vols.
Received by gift.....	335 vols.
Transferred from the pay duplicate collection.....	130 vols.
Total additions	1,394 vols.

Withdrawn	557 vols.
Net increase for the year.....	837 vols.
Number now cataloged.....	50,799 vols.
New titles cataloged, 1927.....	988
Number of cards in catalog.....	102,788
Number of periodicals received.....	125 titles

All the accessions for the year have been cataloged. The new titles added were classified as follows:

Reference and General Works.....	34
Philosophy	16
Religion	28
Sociology	40
Education	8
Language	9
Science	27
Useful arts	38
Fine arts.....	58
Music	12
Recreation	23
General literature	52
Poetry and drama	91
Travel	54
History	45
Biography	74
Fiction	129
Books in foreign languages	18
Juvenile books	232

The selection of books for purchase depends largely upon the public demand for them. The rising price of books in general has prevented buying the more costlier ones on the eve of publication, but in reviewing the accessions for the year it will be found that we have kept fairly well up-to-date in supplying current publications.

The several rental libraries in the city, the "Literary Guild" and "Book of the Month Club" have tended to lessen the demand for fiction to such an extent that it is noticed in a lower circulation of novels.

A selection of a few of the new books that have been most popular would include the following: "We," by Charles A. Lindbergh, the

intrepid and adventurous young aviator who gives under the above title the story of his non-stop flight, the first achieved by airplane from New York to Paris; "Trader Horn," a fascinating and original work of an old-time trader and prospector on the Ivory Coast of Africa, recounted in his old age; "Mother India," by Katharine Mayo, a revelation of the superstition, misery and destitution of the congested population of India; "Napoleon," by Emil Ludwig, the distinguished German historian; "Woodrow Wilson," by Ray Stannard Baker, two volumes having been published, one covering the period of his youth, and the other the years at Princeton; "The Royal Road to Romance," by Richard Halliburton, an entertaining account of travels in various parts of the world by a young graduate of Princeton; Poetry was represented by a remarkable poem, "Tristram," by Edwin Arlington Robinson, and "The King's Henchman" by Edna St. Vincent Millay which was used by Deems Taylor for the libretto for the American grand opera composed by him. In the long list of novels four at least stand out as worthy of inclusion in a short list: "Death Comes for the Archbishop," by Willa Cather; "The Grandmothers," by Glenway Wescott; "Giants in the Earth," a saga of the prairie, by Ole Edvart Rolvaag, and "The Bridge of San Luis Rey," by Thornton Wilder.

The mutilation of books and magazines and losses by theft, although not large considering the patronage of the library, is most regrettable. As watchful as the staff endeavors to be, they have never been able to apprehend one of these miscreants. Another unpleasant fact to report is the loss of books charged to negligent borrowers who fail to return them in spite of our strenuous efforts to get them back. This year such losses number 61 volumes. There seems to be a growing tendency among our patrons, both young and old, to keep books overtime. It was necessary to send out 7,800 overdue notices this year.

REFERENCE WORK

The constant use of the reading and reference room testifies to an increasing service rendered to students and others. Keeping in touch with community activities and topics of the day has necessitated giving space for books reserved on many subjects as they came up for special attention. Besides questions requiring much research, study

material has been selected for schools and clubs. Upwards of one hundred of the leading periodicals are received regularly thus supplying the latest word on topics too recent to be made the subject of a book. Requests for information about old Burlington and its residents, also requests for reading lists have been received from different parts of the country, even one request came from a boy in Virginia asking for a list of books suitable for sixth grade pupils.

Adult education, or, as libraries express it, "Reading with a Purpose" is being stressed throughout the library world. This movement has been given an impetus by the attention accorded it by the American Library Association. The Association has published booklets on thirty-one topics, each giving a comprehensive survey of the subject with a list of books for further reading. Our library has the complete series which is proving helpful and suggestive to a group of readers long out of school.

CHILDREN'S ROOM AND WORK WITH SCHOOLS

Circulation of fiction from children's room.....	14,722
Circulation of non-fiction from children's room.....	10,105
Total circulation	24,827
Number of new books for children's room.....	327
Number of school rooms supplied with books.....	32
Number of books issued for school rooms.....	2,389
Number of stereographs and pictures issued for school rooms....	865
Number of books issued from school rooms for home use.....	7,422

The total circulation from the children's room was practically the same as last year, but from the school rooms the circulation shows a decrease, although a slightly larger number of books were supplied the schools. Our relations with the local schools and colleges continue to be most cordial and satisfactory. Hundreds of books are issued during the school year for required reading in accordance with lists selected by teachers and librarian in collaboration.

The Vermont Interscholastic Debating League was again supplied with reference material, and our local team under the leadership of Louis Lisman was entitled to debate in the finals at the University of Vermont. At the close of the school year the Art Department of the High School, under the direction of Miss Alice G. Jackson, Supervisor, gave a noteworthy exhibit of the year's work. Considerable interest

was manifested in the exhibit, and no day passed without a goodly number of visitors. The interest in Children's Book Week seems to have waned with us as for the past two years very few of our patrons have cared enough about it to visit the library for that purpose. We desire to emphasize the fact, however, that not for any special week but at all times throughout the year we shall be pleased to show upon request our fine collection of carefully selected, artistically illustrated books for young readers.

MISCELLANEOUS

At the opening of the year the library sustained a saddening and serious loss in the death of Alexander Berger after a brief illness. Mr. Berger's period of service was short—only two years—but of such excellence as to be worthy of highest commendation and lasting remembrance. Miss Edith Samson who had been serving as a substitute helper became a member of the regular staff upon Mr. Berger's death, and Miss Mary P. Lane began work as a substitute.

Gifts of books, pictures and cut flowers were received from many sources. The interest thus manifested in the welfare and upbuilding of the library by so many citizens and friends, some of whom are no longer residents here, is most gratifying and heartily appreciated. We would express our thanks again to the publishers of our local papers for gifts of their daily issues, and for space given the library for printing our lists of new books and other items of interest regarding our activities.

The work of the year could not have been accomplished without the interest of the staff, and their endeavors to make the library of service to all alike. In closing I desire to express my gratitude to the Board of Trustees and the Board of Library Commissioners for their continued support and counsel.

Respectfully submitted,

GEORGE DANA SMITH,
Librarian.

CIRCULATION STATISTICS

SCHOOL CENSUS REPORT

TABULATED SUMMARY OF SCHOOL CENSUS

SECTION 1248—GENERAL LAWS

Burlington, Vt., August, 1927.

The following statistics derived from the census of children of school age, resident in this town, enumeration of which was made in August, 1927, are hereby submitted.

BETWEEN "6 AND 8 YEARS," MEANS FROM SIXTH TO EIGHTH ANNIVERSARY
OF BIRTH

- | | |
|--|-------|
| 1. Number of children between 6 and 8 years..... | 1,250 |
| 2. Number of children between 8 and 16 years..... | 3,056 |
| 3. Number of children between 16 and 18 years..... | 667 |
| 4. Number of children between 6 and 18 years (sum of preceding
items) | 4,973 |
| 5. Number of boys between 6 and 18 years..... | 2,506 |
| 6. Number of girls between 6 and 18 years..... | 2,467 |

Respectfully yours,

Signed: J. A. RUST,

Clerk of School Board.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

January 1, 1927 to December 31, 1927

In compliance with Section 162 of the City Charter I hereby submit my sixth report as Superintendent of Schools and the sixtieth report of the Department of Public Schools.

On the pages immediately preceding, certain tables will be found giving statistical data regarding the attendance of pupils in the various schools, and the financial statement of the Department for the year ended December 31, 1927.

The reader who studies this report from the standpoint of a taxpayer will no doubt seek to understand the reason for the increase in expenditures over past years.

The financial report shows an increase in expenditures of \$26,923.78 over the previous year and an increase of \$54,576.98, over the year 1922.

The statistics on pages 42-43 of this report show a comparison of expenditures for the various items for the years 1926 to 1927. The only item in that table needing explanation is that of \$12,647.82 for capital outlay which is about \$8,000.00 larger than the amount usually devoted to capital outlay. This expenditure includes walks and a part of the grading about the Edmunds High School and Junior High School Buildings, bleachers in the gymnasium, refrigeration equipment for the domestic science rooms and cafeteria in the Junior High School and small items of furniture.

Since attention has been deliberately called to an increase in the cost of running the School Department during 1927, over the cost of the same period five years ago, some explanation is desirable.

In 1927 the total paid for salaries of the Superintendent, Supervisors, Principals and all Secretaries and Clerks in the Superintendent's and Principal's offices was \$3,154.52 larger than in 1922. The amount paid to class room teachers in 1927 was \$25,529.89 more than in 1922. In the same period Janitors' salaries increased \$2,389.63, in-

surance \$2,243.83 and the amount spent for repairs and maintenance was \$9,710.15 larger in 1927 than in 1922.

Thus it will be seen that of the total increase in the cost of schools in the past five years \$28,684.41 was devoted to the increase in salaries of those engaged in the work of pupil instruction. This is particularly significant because of the fact that the number of supervisors, principals and teachers was four less in 1927 than in 1922, the number having decreased from 114 to 110.

THE TEACHING STAFF

As salaries have increased the Board of School Commissioners have from time to time changed the professional requirements of teachers seeking appointment in Burlington.

The requirements now stand as follows:

ELEMENTARY SCHOOLS

- (a) Four-years high school course.
- (b) Two-year normal school course.
- (c) Two years teaching experience.

JUNIOR HIGH AND HIGH SCHOOLS

- (a) Four-year high school course.
- (b) Four-year college course or equivalent professional training.
- (c) Two years teaching experience.

For teachers with two years training the salary schedule runs from a minimum of \$1,000.00 to a maximum of \$1,300.00, and for those with college training from \$1,100.00 to \$1,650.00.

These schedules are practically the same as those in other cities of the State, however, Rutland, Montpelier, Barre, Brattleboro and some other towns pay larger salaries to their high school teachers. Therefore even though salaries are much better than they were, it is, nevertheless, true that Burlington is not the leading city in Vermont in this respect.

A summary of the table showing the date of appointment of the various teachers, brings out the fact that twelve teachers have taught in Burlington twenty-five or more years, seventeen have taught from fifteen to twenty-four years, thirty-five from five to fourteen years and

thirty-five have taught here less than five years. Furthermore of the one hundred nine members of the teaching force, including Principals and Supervisors, eighty-three are residents of Burlington and twenty-six are non-residents.

MAINTENANCE OF PROPERTY

The funds expended in 1927 for maintenance and repairs amounted to \$13,176.09. This is larger than in past years but is much smaller in proportion to the valuation than the amount expended annually by large industrial and business firms.

Some of the largest items of repair during the past year were painting the exterior woodwork at the High School and at the Ira Allen School, painting all the ceilings and walls at the H. O. Wheeler building and the erection of fences around the playgrounds at the Adams and Lawrence Barnes Schools.

On the whole the entire property of the School Department is in better condition than for several years, but the following repairs are urgent: a new flooring in the corridor on the first floor of the Edmunds High School, painting on the exterior woodwork at the Converse, Lawrence Barnes and Pomeroy Schools, repairs to the roof of the Lawrence Barnes building, and a new fence about the Pomeroy School grounds.

This last item is especially desirable as the Park Department will then furnish equipment and supervision for a summer playground at the Pomeroy School. The patrons of this district are very anxious to have this done and it would no doubt, prove very successful.

The playground at the Lawrence Barnes School had a large attendance throughout the entire summer vacation in 1927.

HEALTH SERVICE

Although there has been a change in the past year in the personnel of those engaged in our school health service, there has been little change in the aims of the Department or the methods employed to secure the desired results.

Both the doctor and nurse feel that their work is seriously handicapped by lack of time to do remedial and follow-up work. There are, in the public schools, approximately three thousand pupils to examine and about one thousand more in the Cathedral Grammar and

High Schools. The examination of these four thousand pupils takes practically all the time of the doctor and at least half the time of the nurse, up to the first of January or February.

Either another nurse should be added as soon as funds will permit or some change should be made in the method of examination, so as to permit more time for corrective work.

At its regular meeting in December, 1927, the Board of School Commissioners voted to have the children of the Kindergarten and the first three grades given the toxin anti-toxin treatment for diphtheria. This treatment will be given during the winter and spring of 1928 by Dr. Rees and Miss Brown, the School Doctor and School Nurse.

By immunizing the children in the lower grades this year, and continuing to immunize those entering school every year, it is expected that within a few years all children will have been immunized. Although the treatment is not compulsory it is hoped all parents will have their children immunized.

HOME STUDY AND A LONGER SCHOOL DAY

The question of a longer school day and less home study has been a matter of real interest to the Superintendent during the past year, and it has also been a troublesome question for many parents. It is discussed briefly in this report.

In September, 1927, the Junior High and High Schools were organized on the basis of six fifty-five-minute periods instead of seven forty-five-minute periods. The schools were so organized with the hope and expectation that part of this period would be used for supervised study and thus enable the pupils to do the same amount of work with less home study.

But while we have made a longer school day, we have, according to reports from parents, made little, if any progress in decreasing the hours of home study. We hope for better results during the last half of the school year.

It is our purpose to establish a school day of four and one-half hours for all pupils of the first grade, five hours for the second grade and five and one-half hours for grades three to six, inclusive. The above hours would include the recess and physical training period with no home study required. We would continue the present daily schedule of the High Schools and limit home study for the average

pupil to not more than fifty minutes or an hour daily in the seventh grade, gradually increasing the load of home study to a maximum of two hours in the twelfth year.

COURSE OF STUDY

During the past two years, the principals and teachers have given considerable thought and study to the Course of Study for the Elementary Schools and have done considerable work toward a revision of the Course in certain subjects. Such a revision is desirable in order to bring the Course of Study up to date, and it is necessary, since the last revision of the City Course printed in 1914 is entirely out of print.

Work on the completion of a new City Course of Study, however, will be postponed until the State Department issues a new curriculum for the elementary school. The work of revising the State Course is now well started and should be in the hands of teachers sometime during 1928.

MUSIC

Our various musical organizations have continued to progress and improve and at present the High School is represented by the best orchestra and band and the best chorus in the history of the school.

In May of 1927, the orchestra and band competed at Boston in the New England festival and performed with credit to themselves and the city. I repeat again that Mr. Holmes deserves much credit for the development of these organizations during the past five years.

The excellent work of Mrs. Pitkin with the chorus was clearly demonstrated by the excellent singing in "The Oread Stunt Night" of 1927 and in the concert given by the orchestra and chorus in December.

THE HIGH SCHOOL BUILDINGS

After occupying the new Junior High School building for an entire year, we are glad to report that it is meeting the need for which it was designed.

While it has been true that classes in the seventh year were crowded during the fall term, this was due to the need of more seventh year teachers rather than lack of class rooms.

The gymnasium is filling a long-felt want, and is in constant use from Monday morning until Saturday night. Every pupil in both the High and Junior High Schools spends two hours per week in physical training class. In addition, two or three hundred boys and girls are playing basketball on varsity, class and room teams.

The varsity teams have been particularly successful since they began playing on the big floor. In 1927 the boys' team won the State Championship and represented Vermont in the National Tournament at Chicago.

The cafeteria is another part of the new building that is thoroughly appreciated and well patronized. At present about two hundred fifty pupils are buying their noon-day lunch or a part of it in the cafeteria. It is managed without expense to the School Department, but no attempt is made to run it at a profit that will any more than provide for the necessary replacement of dishes and small equipment.

IN CONCLUSION

The year just closed has been a good year in the schools. All established departments of school work have been carried on efficiently. The morale of the teaching force is good, as shown by their attitude toward professional study and improvement.

I want to repeat that the efficiency of a school system may be measured by the strength or weakness of its teaching staff, and I acknowledge with pleasure and gratitude the loyal devotion of teachers and principals to their work throughout the year.

Respectfully submitted,

LYMAN C. HUNT,
Superintendent of Schools.

REPORT OF THE

BOARD OF PARK COMMISSIONERS

Burlington, Vt., December 31, 1927.

To the Honorable City Council:

GENTLEMEN:—Your Board of Park Commissioners respectfully submits herewith the annual report of the work done by their department during the year 1927.

The parks of the city continue to be patronized by large numbers of our citizens and the touring public. The parks are the front door of our city and your department has endeavored to maintain them in an appropriate manner.

The most popular drive, and one which few strangers fail to take, leads through Battery Park, where delightful but ever-changing views of the waters of Lake Champlain held in place by the Adirondack Mountains, rivet the attention and broaden the imagination; thence along North Avenue with the Green Mountains on the right and the lake on the left to Ethan Allen Park; thence through the park to the pinnacle from which one sees an unsurpassed panorama of mountains, lake, meandering river and rich meadows.

Ethan Allen Park is the gem of the park system. Its open lawn, its tall trees, its numerous shady paths leading to Ethan Allen tower and the pinnacle all combine to make a location which continues to lure individuals and picnic parties in large numbers not only from our city but also from many neighboring towns. The addition of new apparatus in the playground has added much to the pleasure of the many children who came with their parents to this park.

The Municipal Bathing Beach was well patronized. On warm days the facilities were taxed to capacity. The store was conducted in a most satisfactory manner by Mr. Ed. Moran and served both the patrons of the beach and the many tourists from the municipal camping area. In connection with the Burlington Sports Club a series of swimming races was held during the summer and suitable medals were awarded the winners. The beach is proving a valuable addition to Burlington's summer attractions.

The Tourists Lodge and camp grounds entertained a large number of persons. There were 1,409 registrations of cars. As each car carries an average of 4 persons the camp accommodated 5,636 persons which was an increase of 212 over the previous year. These tourists came from 31 states, Panama, District of Columbia and three provinces of Canada. One family from Quebec has camped here 8 times in the past four years. The tourists cooperate with the caretaker in maintaining a quiet, clean and orderly camp. The hot and cold showers which were installed last spring were appreciated especially by the women and children who did not care to go to the lake for a swim.

The four playgrounds in the city were well attended. This year a new playground was added on the land bought by your Honorable Body at the Lawrence Barnes School. Swings, sand boxes and a slide were installed. The total attendance at the four playgrounds was 28,688 divided as follows: Battery Park, 3,691; Lawrence Barnes, 6,118; Roosevelt Park, 10,381 and Smalley Park, 8,168. These numbers do not include the persons using the baseball diamonds at Smalley Park and Roosevelt Park. The cost of supervision was 1.4 cents per half day per child. It would be difficult to overestimate the value of these playgrounds to the children of the city. With the increase of traffic on our streets playgrounds are becoming more and more essential.

The skating rinks were crowded on every good day and offered safe sport for thousands of young people.

The street trees have received much attention. The increasing demand for straight cement walks along narrow streets is causing the death of many fine trees. The tree work has been mainly devoted to the removal of dead and dying trees, pruning of dead branches and planting of young trees, although we have many miles of trees that are in fairly good condition.

The special appropriation for the removal of poplar trees was used in removing the largest and more dangerous. Many trees were cut during the past three years but there still remain some poplars in the city streets.

The work on the construction of the Grand Stand at South Park is under way. The city engineer took charge of that work at the request of the Park Commissioner. The work will be finished in time for the 1928 athletic season and should be a valuable asset to our two city high schools.

The ornamental lighting at the Municipal Bathing Beach, which was authorized by your Honorable Board, was not completed by the Light Department on account of the flood. The Park Department has a balance of \$960.33 from the receipts of the bathhouse and tourists' lodge to complete this work.

The Board wishes to express its appreciation of the cooperation which it has received from your Honorable Body during the past year. This has added much to the pleasure of the work of your commissioners.

Respectfully submitted,

THOS. F. CONLON, Chairman,
J. J. FLYNN,
HENRY WAY,
J. HOLMES JACKSON,
R. L. BEAULIEU.

REPORT OF THE

CEMETERY COMMISSIONERS

January 17, 1928.

To the Honorable City Council:

GENTLEMEN:—The Board of Cemetery Commissioners respectfully submit herewith the annual report of the Cemetery Department, with receipts and disbursements for the year ending December 31, 1927.

The Board has met on various occasions to discuss different subjects pertaining to the cemeteries and we believe that during the year they were all kept in their usual excellent condition.

A few improvements were made in Lake View Cemetery and the roads were oiled in Green Mount and Elmwood Avenue Cemeteries. There are numerous other improvements that we would like to make but cannot as we are handicapped by lack of funds.

Respectfully submitted,

W. H. LINSLEY,

EVELYN P. DEYETTE,

FRANK J. HENDEE,

Board of Cemetery Commissioners.

REPORT OF THE HEALTH OFFICER

To the Honorable Board of Health Commissioners:

I submit the following detailed report of the Health Officer for the year ending December 31, 1927.

VITAL STATISTICS

During the year 1927, there were 668 birth certificates filed with the City Clerk, which was eight more than the number for 1926. There were 406 death certificates recorded which was two less than the number for 1926. No deductions have been made for non-residents. Two hundred twenty-three marriage certificates were returned for tabulation.

POPULATION

For the purpose of this report, the population of the city is estimated to be 26,000.

BIRTHS

There were 668 births in Burlington during the year which was eight more than the number recorded for 1926, and gives a birth rate of 25.7. According to the birth certificates filed, 164 of the babies were born to non-resident mothers in our institutions, which reduces our resident births to 504, and the resident birth rate to 19.4.

There were 321 females and 347 males born. The youngest mother was fourteen (14) and the oldest forty-four (44) years of age. There were seven pairs of twins born.

The births exceeded the deaths by 262. The accompanying tables show the births according to months and wards, and ages and nativity of mothers. There is also a table showing the births in the institutions by months.

STILL-BIRTHS

There were eight still-births recorded during the year, which was nine less than the number recorded in 1926.

TABLE IV—MARRIAGES

Months	Number	Nativity of Parties				
		Burlington	Vermont	United States	Canada	Other Countries
January	11	7	10	2	3	0
February	16	8	10	7	3	4
March	14	5	16	5	1	1
April	12	6	10	5	2	1
May	22	17	16	7	3	1
June	23	10	16	16	4	0
July	28	9	23	20	3	1
August	27	18	20	8	5	3
September	19	12	13	8	3	2
October	27	17	23	10	4	0
November	10	5	7	7	1	0
December	14	9	7	8	3	1
Total	223	123	171	103	35	14

Forty-seven licenses were issued to parties contracting their second marriage; eight for third and two for their fourth marriage. Twenty of the contracting parties were divorced persons. The youngest female married was fifteen and the youngest male sixteen. The oldest female married was fifty-seven and the oldest male sixty-one.

There were 406 deaths in Burlington during the year 1927 of which 152 were non-residents. The death rate for the year was 15.6 and excluding the non-resident deaths, the rate was 9.4.

The accompanying tables show the deaths for the year, by months and wards, and also the resident deaths according to age for the different months.

TABLE V—DEATHS BY MONTHS AND WARDS

SANITARY INSPECTION

During the year, kitchens, restaurants, barber shops, meat markets, bakeries, stores and different manufacturing plants and all moving picture theatres were visited. In many instances, it was necessary to issue orders to persons in charge of these establishments to always keep in mind the health regulations.

PLUMBING

During the year, there were 83 permits issued to contractors of Burlington for installation of plumbing which was inspected and tested upon its completion.

CITY DUMP

The city dump, located at the corner of Oak and First Streets, is well taken care of at the present time. Every spring the Board of Health expends a considerable sum of money in cleaning up some of the dumps and other places about the city. I would call attention to

the city carters, truckmen and other persons carrying rubbish about the city to be careful not to overload their vehicles, so that rubbish will not fall into the streets.

RECOMMENDATIONS

Garbage.—The garbage system which has given good satisfaction could be improved materially if some persons would have proper garbage cans, and keep their garbage free from snow, glass, broken crockery, cans, etc.

The appointment of a milk and meat inspector has made a great improvement. The supply of milk and meat which enters the city is inspected by two inspectors, specially trained in that work.

Early in February, the State was threatened with an epidemic of rabies and the State Board of Health issued orders to the various health officers that the necessary precautions should be taken to handle the situation in their respective districts.

A meeting of the local Board of Health was called and at this meeting orders were issued that all dogs in this district must be properly muzzled and on leash except when indoors; furthermore, that all dogs must be given prophylactic vaccination against rabies, this to be done by April 1; and that no dog should be licensed by the city clerk unless the owner of the dog could show a certificate of vaccination.

These orders were pretty generally complied with at once and as a result about 200 dogs, most of them stray mongrels and a few only belonging to owners who did not comply with the orders, were disposed of. In a short time, the epidemic was under control and no serious results occurred in this district, as being directly traceable to the rabies epidemic.

In the early days of November, the devastating flood waters descended upon the towns and villages throughout the Winooski and Lamoille Valleys. To ward off any possible diseases that might follow in the wake of the flood, the State Board of Health recommended that all persons going into and coming out of the flood districts should be inoculated against typhoid fever.

Following such advice, the Health Officer personally gave seven hundred fifty (750) typhoid fever inoculations, the serum being furnished free by the State.

The Visiting Nurses' Association in which the City of Burlington is much interested, and appropriates annually \$3,000 to carry on that commendable work, needs all the encouragement and help from the people of the city to continue its work. In order that this work may be continued, it will be necessary for the city to appropriate the annual amount.

Respectfully submitted,

J. W. COURTNEY, M. D.,

Health Officer.

REPORT OF
VISITING NURSES' ASSOCIATION

CHILD WELFARE WORK FOR 1927

Prenatal calls	4,104
Child welfare calls	7,254
Assisted at deliveries	242
Babies weighed	1,468

This is the report for the sixth year of Child Welfare Work in Burlington. There is an increase of calls in every phase of the work, the routing being carried on in much the same way as in previous years. I find a slight increase in the infant mortality rate but this can be easily accounted for as more deaths than usual have been caused by acute diseases, such as cardiac dilatation and bronchopneumonia, but not one from intestinal disturbances. This shows that our mothers realize what intelligent care and feeding means, also that they appreciate whatever service is available to them through the Visiting Nurses' Association.

The Visiting Nurses' Association cared for 77 per cent. of the resident births in 1927, more than a 15 per cent. increase over the previous year. This infant mortality rate of 77 per cent. under the Child Welfare supervision means 39 deaths in every 1,000 births, whereas of the remaining 23 per cent (who did not receive our specialized care) the rating is 218 per 1,000.

At the present time we have under our care 100 expectant mothers, 160 babies in the homes and 150 babies coming to our Conference.

CLARA DUBUQUE,
Child Welfare Nurse.

REPORT OF THE

MILK INSPECTOR

FOR THE YEAR ENDING DECEMBER 31, 1927

To the Honorable City Council:

During the early months of the year a great deal of work was carried on with the so-called "Sediment Test," a clever means of visibly demonstrating to the producer the amount of actual dirt which he may have allowed to get into his milk. This produced fairly satisfactory results.

As the warmer weather came along, a great deal of work was done in checking up on the bacteria count of the individual producer. In this way the inspector was enabled to concentrate on those who needed attention the most.

After May 15 (the close of license period) new licenses were issued as follows: 28 wholesale, 138 retail, and two seasonal, making a total of \$974 which was turned over to the City Treasurer from these sources.

During the warm, summer months the whole situation was persistently checked up with very satisfactory results.

Throughout the year, samples from the dealers were taken at irregular intervals and turned over to the State Board of Health for analysis. Those that were deficient in any respect were checked up at once. The reports were mailed to all. A summary was published in a daily paper, as provided in section 15 of the Milk Ordinance, in June and January for the information and guidance of the public.

All stores selling milk were inspected—some of them more than once, in an effort to bring them up to a reasonably high standard. There is some work, still to be done, along this line before they are all up to the standard which the consumer has a perfect right to expect. There are a few whose licenses will not be renewed unless they are willing to get into line.

In conclusion, I would like to say that since coming to Burlington,

I have found practically no inclination on the part of either the dealers or producers to evade the Ordinance in any respect and that there is an increasing pride among the dealers in the matter of the quality of their product. This seems to be the result of the persistent efforts of my predecessor Mr. W. B. Silcox and I am glad of the opportunity of so recognizing it.

I shall try to carry on, and still further improve the quality so that the people of Burlington may have added faith in, and consume in ever increasing quantities, this greatest of all human foods—Milk.

Respectfully submitted,

J. M. FRAYER,

Milk Inspector.

Summary of results of analyses of milk samples procured of milk dealers during the year 1927:

REPORT OF THE
MEAT INSPECTOR

Burlington, Vt., January 20, 1928.

The Honorable City Council, Burlington, Vt.:

GENTLEMEN:—I herewith submit the following report as Meat Inspector for the year 1927.

Number of beef carcasses inspected.....	795
Number of veal carcasses inspected.....	1,240
Number of pig carcasses inspected.....	1,999
Number of sheep and lamb carcasses inspected.....	321
Total number of carcasses inspected, all kinds.....	4,355
Number carcasses condemned	87
Number parts of carcasses condemned.....	21
Number store and market inspections.....	712
Number slaughter house inspections.....	62

The sanitary condition of market refrigerators has been very satisfactory during the past year.

Respectfully submitted,

DR. H. L. MILLS,
Meat Inspector.

REPORT OF THE

BOARD OF POLICE COMMISSIONERS

Burlington, Vt., February 8, 1928.

To the Honorable City Council:

GENTLEMEN: We hereby submit our report for the year ending December 31, 1927.

We have held numerous meetings during the past year and four meetings to investigate charges against members of the force, finding all guilty and two members were expelled from the force.

We wish to thank his Honor, Mayor Beecher, the Board of Finance, Chief Russell, Deputy Chief Cosgrove and the members of the police force for unfailing courtesy and support.

O. E. LUCE,
E. H. McGRATH,
T. W. GURNEY,
Board of Police Commissioners.

REPORT OF THE CHIEF OF POLICE

To the Honorable City Council:

GENTLEMEN:—I hereby submit my report for the year ending December 31, 1927.

The records show that during the year the number of arrests made by the department was 374, which are classified as follows:

Arson	1
Assault with intent to kill	1
Assault with intent to rape	5
Blanket Act	4
Breach of the peace	31
Burglary	8
Grand larceny	6
Intoxication	208
Non-support	13
Leaving the scene of auto accident.....	3
Operating automobile in careless manner	21
Operating automobile under influence of liquor ...	18
Operating automobile with three on driver's seat..	13
Operating automobile without license	6
Obtaining money under false pretense	1
Petit larceny	4
Refusal to pay railroad fare	1
Tramp	7
Violation of liquor law	10
Violation of city ordinance	13

J. F. Vincent, day duty, motorcycle officer	1
A. L. Limoge, day duty, motorcycle officer	1
A. J. Gutchell, night duty, motorcycle officer	1
H. E. Bousquet, night duty, motorcycle officer	1
J. M. Delaney, night duty	1
F. A. Lavery, day duty	1
F. J. Yandow, J. F. Brown, C. A. Shaffer, J. H. Francis, traffic duty on Church St. during the summer months. On duty at present at Pontoon bridge	4
Mrs. N. E. L. Austin, Policewoman	1

ROSTER OF REGULAR POLICE OFFICERS

Hubert H. Bates	Arthur L. Limoge
Henry E. Bousquet	Frank J. McCarty
John J. Brothers	James McGowan
John F. Brown	Frank J. Medlar
Paul D. Bouchard	Thomas G. Mongeon
Frank J. Burns	George W. Sinon
Frank J. Donlin	Joseph F. Vincent
Albert J. Gutchell	Levi Vincent
Rufus H. Ham	Frank J. Yandow
Frank A. Lavery	Clarence E. Weston

TRAFFIC REGULATIONS TO BE CONSIDERED

Cross walks should be plainly marked.

Signs should be placed near schools warning motorists to drive slowly and carefully.

Children should be taught to use the sidewalks, to cross only at crossings and not to play in the streets as the streets are not intended for playgrounds.

People should look both ways before crossing a street, first to the left and then to the right. Walk across, do not run, running is dangerous.

It is a good theory to consider that the roadway belongs to vehicles, and that the sidewalks and designated cross walks are for pedestrians.

Drivers should give the right of way to the pedestrians at cross walks.

Pedestrians should not jay-walk.

Amount appropriated for the Police and Criminal Department, \$60,000.

Pay roll, \$52,433.86.

This department has paid to the City Treasurer for services of warrants the sum of \$822.49.

I wish to thank the members of the department for the careful performance of their duties during the past year.

In conclusion I desire to thank his Honor, Mayor Clarence H. Beecher and the Police Commissioners for the kind treatment received.

Respectfully submitted,

P. J. RUSSELL,

Chief of Police.

REPORT OF THE POLICEWOMAN

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—I herewith respectfully submit my tenth annual report for the year ending December 31, 1927.

The work has gone along in the usual way, each day bringing its full quota.

There is a striking similarity in each year's work, but so varied from day to day that it never becomes monotonous.

Personal work with individual cases, and staying by each case until it has been satisfactorily adjusted, has occupied a good share of my time. Working as I do with all the departments, the various organizations and with the State institutions I come in contact with many cases that need my attention.

I have attended about one hundred sixty regular City Court sessions during the year. This keeps me in touch with conditions and gives me information that is valuable in my work.

There has been a scarcity of employment, however, our own city girls and women have been able to get work most of the time. Those from out of town who are without work or funds have been advised to return to their homes and in many cases I have accompanied them to the railroad station and purchased a ticket to their home town thus protecting them by keeping them out of trouble and also ridding our city of undesirables.

After the flood of November 3 and 4, when Burlington was cut off from the outside world it was necessary to furnish a number with shelter, food and other necessities until it was possible for them to leave Burlington and return to their homes. In this work, as in the past, I am given financial aid by the Woman's Protective League, Inc. I wish herein to give grateful acknowledgment.

One of the interesting experiences during the year was the caring for three young girls from New York. They were in camp at Willsboro, N. Y., and came here to spend the day with forty other girls and their Supervisors, three missed the boat and much upset they ap-

pealed to the police department. I kept them in my home over night and took them to the dock the following morning for the early boat. Their well-bred mannerism and grateful appreciation made it a refreshing event.

We have had about the usual number of court cases and commitments have been made to the State Prison and House of Correction at Rutland, the State Industrial School at Vergennes, the State School for the Feeble-minded at Brandon, the State Hospital for the Insane at Waterbury, and to the Guardian Angel Home at Troy, New York. There have also been about the usual number of probation cases.

I wish to thank his Honor, Mayor Clarence H. Beecher, Chief Russell, Deputy Chief Cosgrove, and Sergeant Ryan and all others who have aided me in my work.

Respectfully submitted,

(MRS.) N. E. L. AUSTIN,

Policewoman.

Deputy State Probation Officer for Women.

REPORT OF THE

CLERK OF THE CITY COURT

Burlington, Vt., January 24, 1928.

To the Honorable City Council:

GENTLEMEN:—During the calendar year of 1927, fifteen cases of violation of City Ordinances were entered into the records of this court. The following is a classification thereof:

Failure to comply with traffic signs	9
Failure of auto driver to keep to the right of road	1
Refusing to move auto obstructing traffic	1
Auto driver passing street car	1
Driving auto over fire hose without permit.....	1
Failure of auto driver to obey order of police officer	1
Allowing dog to run at large	1
Total	15

One case was dismissed for want of prosecution.

Another of the said cases stands open.

In the other thirteen cases respondents pleaded guilty and were sentenced to pay fines.

Receipts:

Fines collected	\$60.00
Costs collected	22.77
Total	\$82.77
Paid to the City Treasurer	\$82.77
Due to Court for Clerk fees	14.00
Net balance to City	\$68.77

Respectfully submitted,

ADRIAN J. SIMAYS, Clerk.

REPORT OF THE CITY GRAND JUROR

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—I hereby submit the following report covering the activities of my office from February 10, 1927 to January 2, 1928.

	Continued	Convictions	Discharged	Nol-prossed	Bound over to County Court
Intoxication	..	130	..	..	..
Breach of peace	..	19	..	6	..
Rape	..	..	..	..	2
Attempted rape	..	1	..	1	..
Burglary	..	1	1	1	..
Petit larceny	..	2	1	1	..
Attempted larceny	..	1	..	..	..
Lewdness	..	1	..	..	..
Non-support	2	4	..	7	..
Vagrancy	..	5	..	3	..
Blanket Act	..	2	..	..	..
Violation Law of 1919	2	..	..	2	..
Possessing intoxicating liquor, de- faulted bail	..	5	..	2	..
Operating auto under influence of in- toxicating liquor	..	14	1	..	..
Careless and negligent driving	..	5	..	4	..
Leaving scene of accident	..	2	..	..	..
Minor auto violations	..	15	..	2	..
Obtaining money under false pretenses ..	..	1	..	1	..
Selling encumbered property	..	2	..	..	..
Refusal to pay railroad fare	..	..	..	..	..
Totals: 2 defaulted bail	4	210	3	30	2

There were thirty-three search warrants for liquor issued, at least seven of which brought convictions.

The majority of cases nol-prossed were either substituted by other offenses or disposed of in a more satisfactory manner. Not more than three or four were nol-prossed because of lack of evidence.

The Chief of Police and his department, and other officials have cooperated at all times, and have been thoroughly efficient.

Respectfully submitted,

WARREN R. AUSTIN, JR.,

City Grand Juror.

REPORT OF THE CITY ATTORNEY

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—During the last year I have prosecuted in the City Court fifteen cases for violation of the City Ordinances, most of them being violations of traffic regulations.

I have prepared and presented to the State Tax Commissioner a bill for rebates due the City from the State on tax abatements for the past six years and have still to have prepared and presented a bill for the last lot of abatements. The State Tax Commissioner has been so busy with other pressing matters that he has had no chance to audit and settle the bill already presented but I hope to secure a settlement of the same before long.

I took part with the Board of Assessors in a conference between them and the State Tax Commissioner at Montpelier relating to the duties of the Assessors regarding the taxation of intangibles and there is now pending in the Supreme Court the appeals of Julian B. Clark and others from the tax assessment of their intangibles and involving the validity of taxes amounting to about twenty-seven thousand (\$27,000) dollars. While the Attorney General and special counsel employed by the Governor on behalf of the State on these tax appeals expect to do the greater part of the work in the briefing of these cases, it will be necessary for me to devote much time to the same and the cases will probably be argued at the May term of the Supreme Court. The principal claim made by the appellants is that the law relating to the taxation of stocks is unconstitutional.

I have devoted much time to the collection of real estate taxes but have not as yet found it necessary or advisable to institute legal action and have a number of such taxes in process of settlement.

There are several amendments that should be made to the City Charter that I shall call to your attention at the proper time.

I have assisted the Overseer of the Poor to institute under the provisions of Chapter 167 of the General Laws two prosecutions, in each case to obtain support for a child that has become a public

charge on the City. One of these suits is in process of settlement and the other is now pending.

Many claims against the City have been presented for my consideration, in none of which was the City liable and these claims have all been withdrawn. The duties of my office have required the greater part of my time, but there is nothing further that deserves special mention.

Respectfully submitted,

THEO. E. HOPKINS,

City Attorney.

January 19, 1928.

REPORT OF THE ELECTRIC LIGHT COMMISSIONERS

To the Honorable City Council, City of Burlington, Vt.:

GENTLEMEN:—During the year 1927 your City Electric Light Department has continued its successful operation—a success measured in improved service, in increased patronage, as well as in increased revenue.

It is worthy of note that an amount of money in excess of that required for the retirement of its bonds has been turned over to the City Treasurer from profits. In other words, the plant has more than paid for itself from earnings and now represents a clean asset to the City and its citizens.

The auditors' report indicates an increase in gross revenue, a reduction in operating expense and an increase in net revenue.

Surely a healthful situation. The physical condition of the plant is doubtless as good as at any time in the past, though it is the intention of your commissioners to pursue a policy of betterment for both the plant and equipment which will be continuously reflected in improved service to its patrons.

For more detailed information we respectfully refer to the Superintendent's report and to the auditors' statement of financial condition appended.

H. H. MILLER,
R. N. HILL,
E. F. GEBHARDT,
Commissioners.

REPORT OF THE ELECTRIC LIGHT DEPARTMENT

To the Board of Electric Light Commissioners, Burlington, Vt.:

GENTLEMEN:—I wish to submit to you my first annual report covering the operation of this department for the past year.

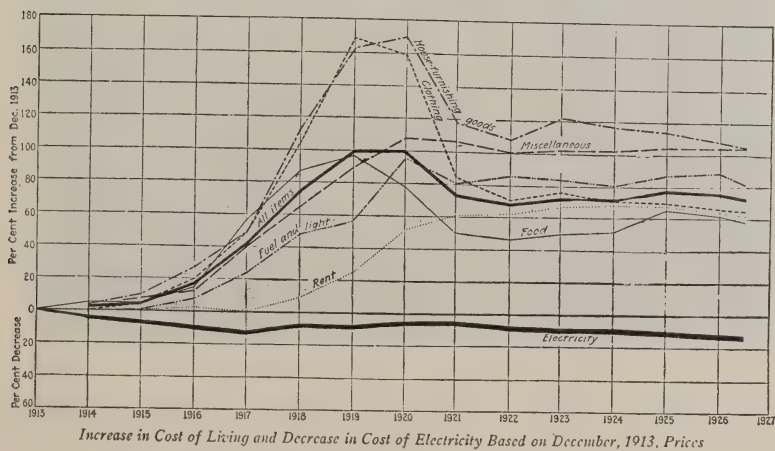

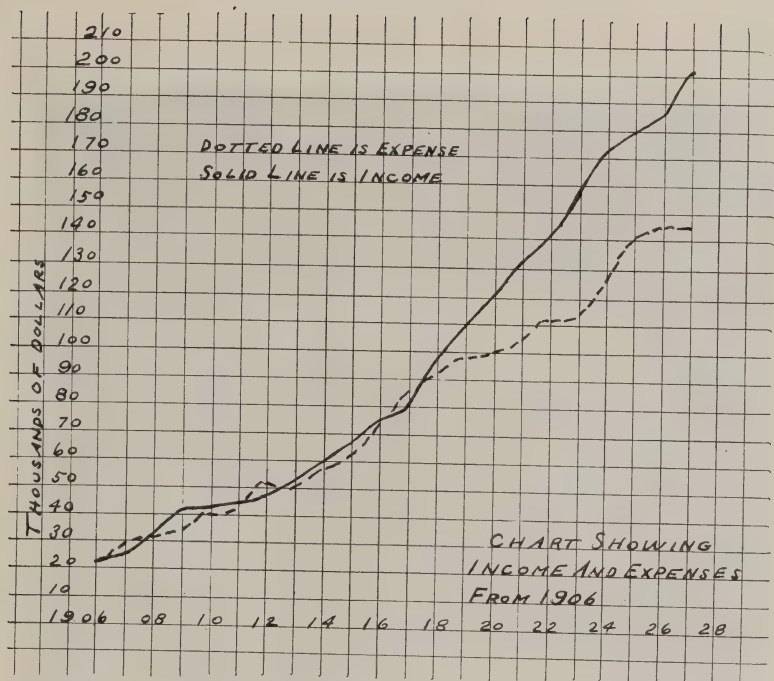

The end of this year marks the end of twenty-two years of existence of the Burlington Electric Light Department and elsewhere in this report will be found a chart showing graphically the income and expenditures from the 1906.

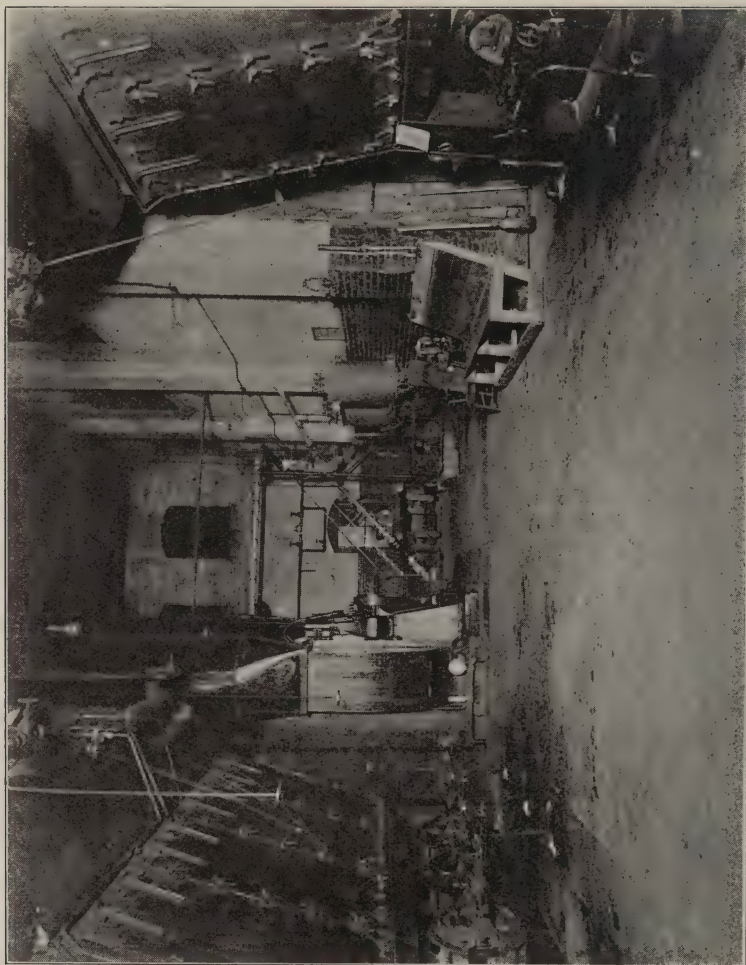

While this may not reflect with great exactness the history and growth of this department it does in a very general way tell the story of the growing popularity of this branch of the municipal activity of this city.

This year, you will note, is the first time in its history that the gross operating revenue exceeded the 200,000 dollar mark, and the municipal department also shows that enough money has now been set aside as a sinking fund to retire the entire bond issue of the department. The only important thing in connection with this fact is that from now on all the profits from this department, after proper provision is made for its maintenance, can go to the city and be expended in any way that seems best.

By referring again to the chart you will see that the increase has also grown at about the same rate and this in turn means that the distribution system has been built up and extended to provide for this growing business. This distribution system now needs to be redesigned, remodeled and brought up to the standards of the best engineering practice.

A survey is now being made and a definite report will be submitted to you dealing with this, with recommendations and costs attached. This survey will also include a report on the street lighting and a recommendation that certain changes be made in order that the streets of the city, outside of the main business section, be adequately and properly lighted. Any improvement and changes made, should be done in accordance with a definite plan and one that will

BOILER ROOM

fit in with the plans of the other wire companies occupying the streets of the city. The plan of eliminating all unnecessary poles should be continued, as now wherever possible, one pole is used by all the different companies.

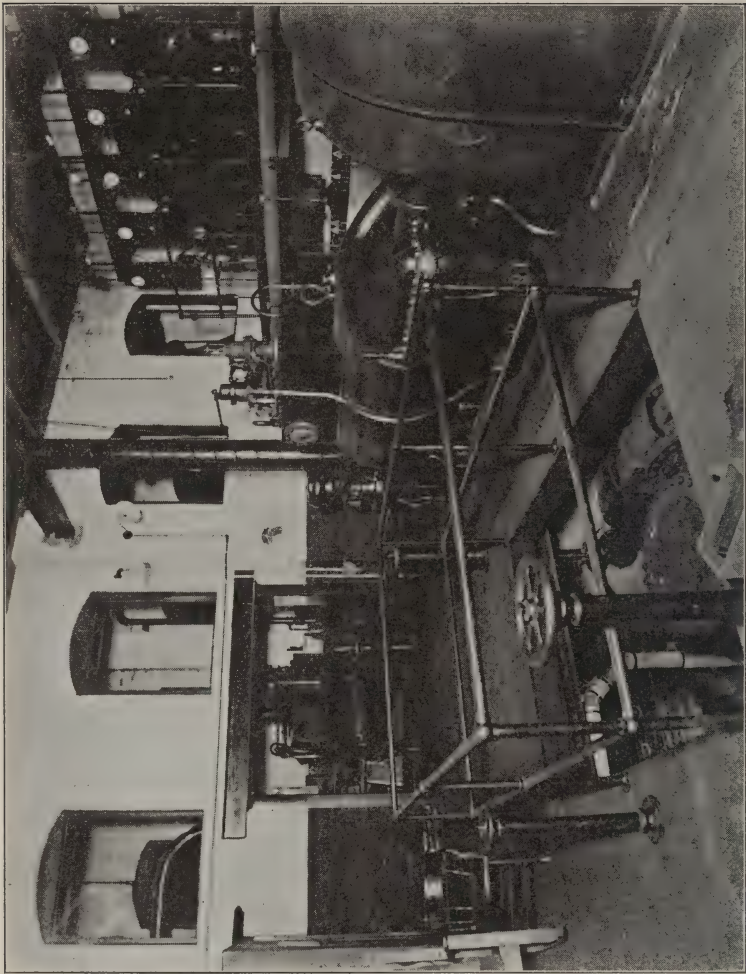

Under normal conditions current is obtained exclusively from the Public Electric Light Company's station at Fairfax Falls, as their station at Milton has not yet been placed in service. This development was about ready to be placed in operation before the flood of November 3. A new dam had been built during the summer and the generators and other equipment had been installed. The flood damaged the plant somewhat, and delayed putting it into operation so that it probably will not be placed in service for some time yet. When it is completed and placed in use it will give the city an additional source of power and should result in a betterment of service as far as the primary source of supply is concerned. This additional source of power and a carrying out of an improvement program as above outlined should result in the department being able to furnish absolutely reliable service in any quantity to its present patrons and be in a position to take on such additional business as the future may demand.

It is the plan to continue to keep the steam station, located near Lake Street, in such condition as will enable it to meet the entire requirements of the patrons of this department at all times, and in line with this policy an arrangement is being made to increase its capacity which will be sufficient for the present time, ultimately it will be necessary, if this policy is continued, to purchase a new boiler to be used in addition to the ones now in use.

The necessity of keeping this plant in readiness at all times was demonstrated at the time when the hydro-station at Fairfax Falls was out of service by reason of the flood.

There is no apparent reason why, with economical and prudent management, this electric light department owned by the city, and operated for the benefit of the people of the city, cannot continue to contribute more and more toward the welfare of its citizens.

There are several ways in which this department has been of benefit to the city, one of the greatest probably comes from the fact that the rates are controlled by the local city government, thereby guaranteeing the users of electricity against excessive charges. Another one is that it can more easily control the lighting of the streets,

TURBINE ROOM

the arrangements of poles and wire on the streets, and, in general, keep the electrical development up to date and arrange for an adequate supply for its own use and the use of its patrons.

Respectfully submitted,

J. R. TOZER,
Superintendent.

THIRTY-NINTH ANNUAL REPORT
OF THE
WATER COMMISSIONERS

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—The Board of Water Commissioners herewith submit their report for the year ending December 31, 1927.

The receipts from the water rates have been \$102,068.99. The unpaid water bills, which are 132 in number, amount to \$667.36. The pumpage for the year was 527,723,000 gallons, an increase of 3,074,000 gallons over last year.

The bonded indebtedness of the City on account of this department is as follows:

Four per cent. bonds due in 1928.....\$51,000.00

Respectfully submitted,

D. L. SANDERS,

E. O. MITIGUY,

J. L. HALL,

Water Commissioners.

SIXTY-FIRST ANNUAL REPORT
OF THE
SUPERINTENDENT OF THE WATER WORKS

*To the Honorable Board of Water Commissioners of the City of
Burlington, Vt.:*

GENTLEMEN:—The following is a statement of the receipts and disbursements of the Burlington City Water Works for the year ending December 31, 1927, as taken from the books of the office.

CLEANING NORTH RESERVOIR

FIRE HYDRANTS

Number of public hydrants now in use.....	242
Number of private hydrants now in use.....	50
Total number of hydrants.....	292

Six new hydrants have been added as follows:—

- 1 at corner of South Willard and Beach Streets.
- 1 at corner of Shelburne St. and Gove Court.
- 1 at corner of Park Avenue and Foster Street.
- 1 on North Street at Street Department Barn.
- 1 on Charlotte Street.
- 1 on Pitkin Street.

Hydrants moved to new locations as follows:—

- 1 on Grove Street.

Hydrants have been repaired in the following places:—

- 1 at corner of Pine Street and Marble Avenue.
- 1 at corner of Pine and King Streets.
- 1 at corner of Pearl and Battery Streets.
- 1 at corner of King Street and South Winooski Avenue.
- 1 at corner of North Prospect and Loomis Streets.
- 1 at corner of Shelburne Road and Park Avenue.
- 1 at corner of Mansfield Avenue and Loomis Street.
- 1 on North Winooski Avenue at Car Barn.
- 1 on Pine Street at Baldwin Refrigerator Company.
- 1 on Pine Street at Hickok's.
- 1 on Lake Street.

MAINS

New mains have been laid with 6-inch cast iron pipe on:—

Ferguson Avenue	145 feet
Willard Street	202 feet
Maiden Hair Lane	60 feet
	407 feet

Cement mains have been replaced as follows:—

Pitkin Street, 928 feet of 4-inch pipe replaced by 6-inch cast iron.

S. Willard Street, 245 feet of 4-inch pipe replaced by 10-inch cast iron.

Supply pipe replaced:—

Shelburne Road, 312 feet of pipe replaced by 6-inch cast iron main.

Intervale Road, 815 feet of pipe replaced by 1 inch.

Leaks on cement mains have been repaired as follows:—

1 on South Williams Street.

2 on Pitkin Street.

2 on South Willard Street.

REPAIRS

On cast iron pipe.....	6
On services	16
On hydrants	11
On cement mains	4
On fire services	0

SUPPLY PIPE

210 feet of 1-inch pipe laid on Foster Street.

SERVICE PIPES

63 services of the following sizes have been added:—

5	$\frac{3}{4}$ -inch
50	1-inch
1	$1\frac{1}{4}$ -inch
5	2-inch
2	$1\frac{1}{2}$ -inch

64 services have been discontinued and replaced as follows:—

61 $\frac{1}{2}$ -inch replaced by 1-inch.

1 $\frac{1}{2}$ -inch replaced by $1\frac{1}{2}$ -inch.

2 $\frac{1}{2}$ -inch replaced by 2-inch.

4 services have been discontinued as follows:—

- 1 on Chase Street.
- 1 on Williston Road.
- 1 on South Prospect Street.
- 1 on Hickok Place.

METHOD OF REPAIRING FILTRATION PLANT—CEMENT APPLIED UNDER PRESSURE

NEW FIRE SERVICES

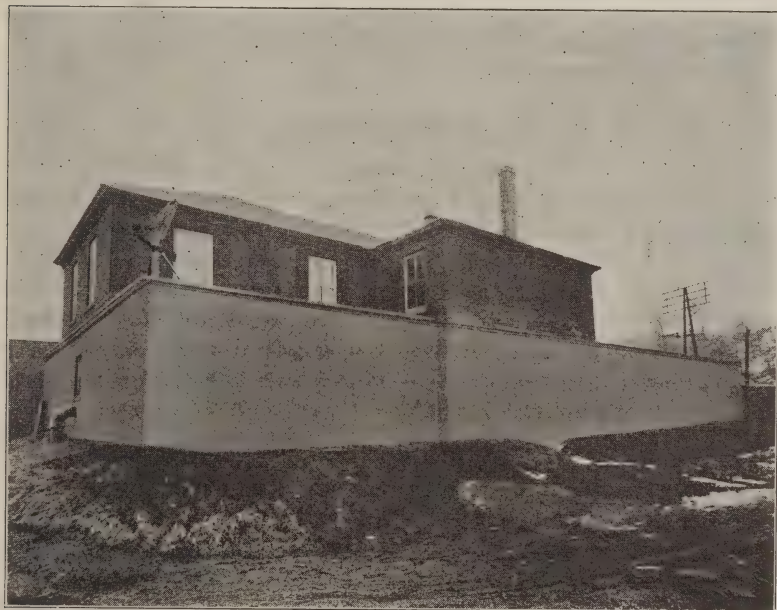

- 1 6-inch, Spear Bros. at corner of Battery and Bank Streets.
- 1 8-inch, Vermont Maple Syrup Company at corner of Pine Street and Marble Avenue.
- 1 4-inch, Memorial Hall at corner of Main and South Union Streets.

LENGTH OF PIPE NOW IN USE

Cement	10,376 feet—about 1.96 miles
Cast iron	237,165 feet—about 44.91 miles
Total mains	247,541 feet—about 46.87 miles
Service pipe	159,985 feet—about 30.30 miles
Supply pipe	39,237 feet—about 7.43 miles

GATES

Gates added during the year	15
Total number of gates now in use.....	948
Number of gate valves smaller than 4-inch added during year.....	8
Total number now in use.....	112

FILTRATION PLANT—REPAIRS COMPLETED

GATES REPAIRED

Four gates repaired in the following places:—

- 1 at corner of Marble Avenue and Hayward Street.
- 1 at corner of North and North Prospect Streets.
- 1 at corner of South Willard and Spruce Streets.
- 1 on South Prospect Street at Red Stone.

STAND PIPES

One stand pipe was repaired at Battery Park.

WATERING TROUGHS

Four watering troughs have been repaired at the following places:—

- 1 at corner of Willard and Union Streets.
- 1 at Battery Park.
- 1 on Pine Street.
- 1 on Lake Street.

CURB STOPS

Three curb stops have been replaced at the following places:—

- 1 at 395 College Street.
- 1 on North Street.
- 1 at corner of Prospect and Main Streets.

HIGH SERVICE

District supplied: South side of Colchester Avenue from University Place to East Avenue, East Avenue, Main Street from Summit Street to University Place, Mansfield Avenue and from Mansfield Avenue to N. Prospect Street on Loomis Street, Wilson Street and North Street to N. Prospect Street, S. Prospect Street, south of Main Street, Summit Street, University Place and Williston Road.

The consumption on the high service as indicated by the amount measured to consumers through meters was 36,201,000 gallons.

LOW SERVICE PUMPING STATION

1927	WATER PUMPED	
January	41,674,000	
February	37,679,000	
March	41,900,000	
April	40,832,000	
May	42,099,000	
June	42,948,000	
July	46,873,000	
August	54,210,000	
September	46,415,000	
October	46,794,000	
November	43,193,000	
December	43,109,000	
Total 1927	527,723,000	
Total 1926	524,649,000	
Increase	3,074,000	

Daily average 1927	1,445,816
Daily average 1926	1,437,394
Average daily consumption per capita, 58.6 gallons.	
Average daily run; 13 hours, 35 minutes.	

One hundred and forty-seven curb and gate boxes were raised or lowered, extended and wholly or partly replaced.

The department responded to 502 calls to open or shut the stops at curb. There are 33 two-inch stand pipes available for street sprinkling.

There are now in use 4,530 meters, an increase of 77 over last year. Fifty-three meters were frozen and 987 were removed and replaced for other reasons, such as street work, cleaning, repairs, etc.

Five hundred and two postals were mailed to consumers, calling attention to excessive use, waste or leakage, as reported by our inspectors.

Consumption high service 1927	36,201,000
Consumption high service 1926	36,692,200

In 1926 our cash receipts were \$100,505.11 and \$102,068.99 in 1927 showing a gain of \$1,563.88 over the previous year. This gain is due to additional new services.

One hundred and forty-five feet of six-inch cast iron main was laid on Ferguson Avenue between Foster and Briggs Streets. Two hundred and two feet of ten-inch cast iron main was laid on South Willard Street south of Beach Street. Sixty feet of six-inch cast iron main was laid on Shelburne Road at Maiden Hair Lane.

Nine hundred and twenty-eight feet of four-inch cement pipe was replaced by six-inch cast iron pipe on Pitkin Street. Two hundred and forty-five feet of four-inch cement pipe was replaced by ten-inch cast iron pipe on South Willard Street south of Beach Street making a total of four hundred and forty-seven feet of ten-inch cast iron main laid this year in South Willard Street south of Beach Street.

Three hundred and twelve feet of six-inch cast iron pipe was laid at Potash Brook to replace a two-inch supply pipe across the bridge which now connects to a six-inch cast iron pipe south of the bridge.

Eight hundred and fifteen feet of one-inch wrought iron pipe was laid in the Intervale to replace a two-inch pipe which was washed out by the flood.

Two hundred and ten feet of one-inch pipe was laid on the south end of Foster Street, this is the end of the street and supplies only two houses.

Six new hydrants were added this year which makes a total of two hundred and forty-two public hydrants.

There is still 1.96 miles of cement main in different streets in the city. The department is planning on replacing this with cast iron pipe as soon as possible.

Changes have been made to the clear well of the Filter Plant which now gives us two smaller clear wells instead of one large one, so that if repairs become necessary we will still have one clear well to use. This work was all completed except the connections to our suction outside the building which could not be made on account of the high water but it will be connected as soon as the water in the lake goes down.

The inside of both the Pump Station and the Filter Plant had not been painted for several years and was very much in need of paint. Both plants have been painted inside and are in a good condition now. We hope to be able to give the grounds around all our plants some attention next year.

The high water and wind this fall destroyed much of the dock in front of the Pump Station and Filter Plant which may make it necessary to put in a new dock in the spring to properly take care of our buildings, as the docks both north and south of our property are all gone. The water raised above the dock and carried off much of the filling between the dock and buildings which made it necessary to raise the face of the dock about three feet. More than four hundred tons of stone was used for this purpose. This stone can all be used in case a new dock is built.

The amount of water pumped in 1927 was 527,723,000 gallons an increase of 3,074,000 gallons over that pumped in 1926.

Respectfully submitted,

JOSEPH E. MOORE,

Superintendent.

SUMMARY OF STATISTICS

FOR THE YEAR ENDING DECEMBER 31, 1927

In Form Recommended by the

NEW ENGLAND WATER WORKS ASSOCIATION

Burlington City Water Works.
Burlington, Chittenden County, Vermont.

GENERAL STATISTICS

Population by census of 1920: 22,879.
Date of construction: 1867-68.
By whom owned: City.
Source of supply: Lake Champlain—Filtered.
Mode of supply (whether gravity or pumping): Pumping.

PUMPING STATISTICS

Builders of pumping machinery: H. R. Worthington and Laidlaw-Dunn-Gordon Company.

Electricity purchased from the Municipal Electric Light Plant.

Total pumpage for the year: 527,723,000 gallons.

Average head against which pumps work: 289 feet.

Average dynamic head against which pumps work: 316 feet.

STATISTICS OF CONSUMPTION OF WATER

1. Estimated population at date	25,000
2. Estimated population on lines of pipe	25,000
3. Estimated population supplied	25,000
4. Total consumption for year (gallons)	527,723,000
5. Average daily consumption (gallons)	1,445,816
6. Gallons per day to each inhabitant	58.6
7. Gallons per day to each consumer	58.6
8. Gallons per day to each tap	298.8

STATISTICS RELATING TO DISTRIBUTION SYSTEM

MAINS

1. Kind of pipe: Cement lined, cast iron, wrought iron.
2. Sizes: From 4 to 30 inch.
3. Extended during the year: 407 feet.
4. Discontinued: 0.
5. Total now in use: 46.88 miles.
6. Length of pipe less than 4 inches diameter: 7.43 miles.
7. Number of hydrants added during the year: 6.
8. Number of hydrants (public and private) now in use: 292.
9. Number of stop gates added during the year: 15.
10. Number of stop gates now in use: 948.
11. Number of stop gates smaller than 4-inch added during year: 8.
12. Number of stop gates smaller than 4-inch: 112.
13. Number of blow offs: 14.
14. Range of pressure of mains: Average 70-85 pounds.
15. Kind of pipe: Galvanized, cast iron and lead.
16. Sixes: $\frac{1}{2}$ to 6 inches.
17. Extended: 1,818 feet.
18. Total now in use: 30.30 miles.
19. Number of service taps added during the year: 53; discontinued: 4.

- 20. Number now in use: 4,906.
- 21. Average length of service: 36 feet.
- 22. Number of meters added: 77.
- 23. Number now in use: 4,530.
- 24. Percentage of services metered: 99½.
- 25. Number of meters and elevators added: 0; discontinued: 0.
- 26. Number now in use: 29.

REPORT OF THE
STREET COMMISSIONERS

CITY OF BURLINGTON, VT., STREETS AND SEWERS DEPARTMENT REVENUES
AND EXPENDITURES, FOR THE YEAR ENDED DECEMBER 31, 1927

To the Honorable City Council:

MESSRS.:—The Board of Street Commissioners submit their report for the calendar year ended December 31, 1927.

REVENUES

Balances at January 1, 1927:

Snow removal	\$ 6,158 68
Less:—Overdraft streets account	99 78
Net balance	\$ 6,058 90

Received from appropriations as follows:

Streets	\$ 61,452 97
Sidewalks	10,000 00
Snow removal	7,500 00
Bridges	1,000 00
Sewers	10,000 00
Sprinkling	10,000 00
Street equipment	8,286 02
Winooski bridge—special	5,000 00
South Winooski Avenue—widening	2,094 43
Potash Brook bridge—special	14,500 00
Street painting and signs	1,200 00
	\$131,033 42

Received from the State of Vermont:

State aid	\$ 3,069 78
Amount matched by City	2,500 00
Potash Brook bridge	5,000 00
	\$ 10,569 78

Received from assessments:

Sidewalks, curbs and gutters	\$ 8,490 38
Sewers	1,607 16
	\$ 10,547 54

Received from materials and labor accounts....	37,757 26
	\$195,966 90

Received from temporary funds:

New Winooski bridge	\$ 436 86
	\$196,403 76

EXPENDITURES

Warrants drawn for materials and labor as follows:

Streets	\$102,796 21
Sewers	12,169 85
Snow removal	8,281 01
Bridges	1,051 48
Sidewalks, curbs and gutters	19,795 36
Sprinkling	11,540 90
Street painting and signs	1,195 89
Winooski bridge—special	5,662 68
Potash Brook bridge	14,378 00
New Winooski bridge	436 86
	\$177,308 24

Appropriations closed as follows:

Street equipment	\$ 8,286 02
South Winooski Avenue—widening	2,094 43
Sewers	95 37
Sprinkling	19 10
Bridges	9 13
Sidewalks, curbs and gutters	1 76
Winooski Bridge—special	9 42
Potash Brook Bridge	6,170 33
Street painting and signs	4 11
Snow removal	1,548 30

\$ 18,237 97

Appropriations open as follows:

Streets	\$ 857 55
	\$196,403 76

Respectfully submitted,

THOS. MAGNER,
 HENRY H. HICKOK,
 A. D. BUTTERFIELD,
 Board of Street Commissioners.

Audited and found correct,
 January 17, 1928,
 FRANCIS C. DERBY CO.

REPORT OF THE SUPERINTENDENT OF STREETS

To the Honorable Board of Street Commissioners of the City of Burlington, Vt.:

GENTLEMEN:—The following is the report of the Superintendent of Streets for the year ended December 31, 1927.

APPROPRIATION TO REFUND THE ADVANCES FROM TEMPORARY FUNDS USED IN
THE FOLLOWING MANNER ARE TO BE MADE DURING 1928

New Winooski Bridge	\$ 436 86
---------------------------	-----------

Audited and found correct,
January 17, 1928,
FRANCIS C. DERBY CO.

From the above account you will note that the Street Department as represented by the several branches of its department such as sewers, bridges, snow removal, sidewalks, curb and gutters, sprinkling, etc., has expended a total of \$187,000. In addition to this amount there was additional work done for other City Departments and outside work totalling approximately \$20,000. Each branch of the Department shows a balance at the end of the year and in some cases an overdraft of the previous year has also been taken care of. Considering the amount of work that has been done and because of the extraordinary work caused by the flood, I feel that we are extremely fortunate in being able to keep our finances on the right side of our ledger.

In addition to this we also have accounts receivable on our books which are due and collectable amounting to approximately \$3,000.00. These accounts are occasioned mostly from the sale of stone from the City Quarry, the sewer connections constructed for new buildings and the replacement of old sewer connections with new, all of which are of a private nature.

STREETS

Pavement Construction.—The pavement construction for the year was principally of the penetration asphalt macadam type, the Bond Issue work having been completed in 1926. In constructing this type of pavement we can divide the work into two distinct classes. Class A, which is the highest type of penetration macadam pavement and is used for moderate and heavy traffic streets and Class B, which is of a lighter construction, in regard to foundation and wearing surface, and is used for light traffic and residential streets. These different classes of pavements with their locations as constructed are as follows:

CLASS A

Clymer Street—From Shelburne Road easterly for its entire length	1,904 sq. yds.
Spruce Court—From Spruce Street northerly for its entire length	560 sq. yds.
Total	2,464 sq. yds.

CLASS B

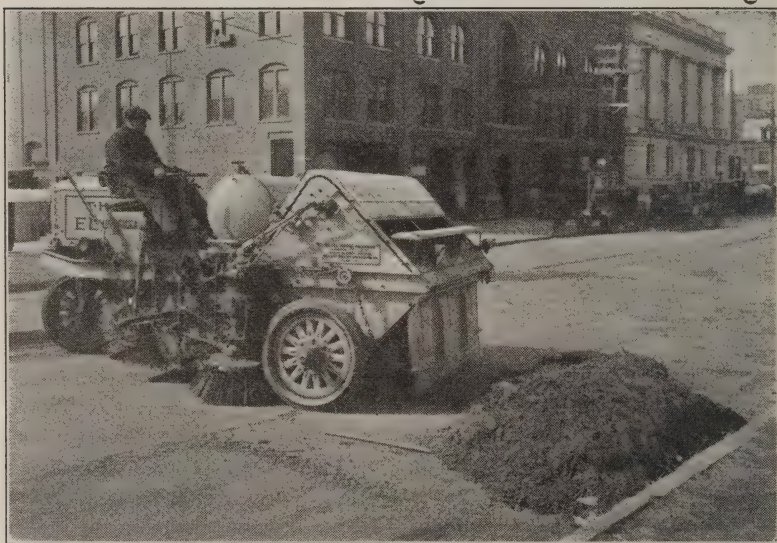

Pine Street—From Maple Street southerly to the rail- road crossing	2,838 sq. yds.
North Street—From Prospect Street to Mansfield Avenue	1,503 sq. yds.
Mansfield Avenue—From North Street to Loomis Street	2,450 sq. yds.
Wilson Street—From Prospect Street to Mansfield Ave..	1,401 sq. yds.
Fletcher Place—From Colchester Avenue northerly for its entire length	1,387 sq. yds.
Summit Street—From Cliff Street northerly a distance of 1,100 feet	3,972 sq. yds.
King Street—From railroad tracks westerly to street limits	240 sq. yds.
Plattsburg Avenue—Heineberg Bridge approach.....	1,303 sq. yds.
S. Prospect Street—From south drive of Redstone southerly about 450 feet	1,513 sq. yds.
Total	16,607 sq. yds.

Gravel.—In addition to the above types of pavements there was constructed a small amount of stone base or gravel pavement on Grove Street from Chase Street southerly a distance of approximately 600 feet making about 1,733 sq. yds. of this type. We also resurfaced Bradley Road from North Avenue to the Howe Farm with an average of about six inches of gravel obtained from the gravel pit on the Howe Farm. The total length of this job was approximately one mile, comprising approximately 9,400 sq. yds. of gravel surface.

Cinders.—Several short stretches of lightly traveled streets were surfaced with cinders, these streets being Briggs Street from Morse Place northerly about 500 feet; Lyman Avenue from Briggs Street to Foster Street, and Harrington Terrace from Maple Street northerly its entire length. The cinder surface is used with the idea that this will carry the load until such time as a more durable surface is needed and can be constructed.

Resurfacing.—Very few jobs were done this year as resurfacing jobs, the principal reason being that there was very little old salvaged materials to be had from any of the construction jobs and therefore this work was of a minor nature this year. The only resurfacing job

of any magnitude was a section of North Avenue from the Thayer School house easterly a distance of approximately one thousand feet. This work consisted of building the entire surface with crushed stone after the depressions had been previously filled in with cold-patch material and then treating the old surface with two applications of heavy asphaltic road oil.

"THE ELGIN" STREET SWEEPER

This machine was purchased in 1923 and during its five years of service it has operated over 15,000 miles of pavements and picked up over 14,800 cubic yards of street dirt. This picture shows the ease in which the machine can be operated, also the manner of dumping the dirt into a neat pile against the curb after having been collected.

Maintenance.—The patrol system of maintenance has worked out unusually well this year with less help and consequently less expense. All asphaltic cold-patch material is mixed at our asphalt plant in large quantities and stored in an open shed while being used on the several patrols.

Street Cleaning.—The street cleaning has been done as usual by the Elgin Street Sweeper and the flushing and sprinkling by the

Elgin Auto Eductor. The cost reports on these two pieces of equipment will be found elsewhere in this report and by comparison with the report of last year you will note that the costs of street cleaning operations has been decreased by approximately \$1,000.00, in other words about 12 per cent. This has been done in spite of the fact that our equipment is one year older and that about 60 per cent. more pave-

ELGIN AUTO EDUCTOR

This Elgin Auto Eductor or catch basin cleaner was purchased in 1925 and during the three years in which it has been operated it has cleaned 1,153 catch basins from which 3,369 cubic yards of dirt has been taken. It has flushed and sprinkled 14,500,000 square yards of pavements. It has hauled more than 6,200 tons of crushed stone and other materials as well as operating a snow plow for plowing the streets in winter and numerous other jobs.

ment area was cleaned this year than last year and over 500 cubic yards more of dirt was picked up from our streets by the Elgin Street Sweeper than was done last year.

Cleaning Catch Basins.—From the report of cleaning catch basins,

a copy of which is submitted as a part of this report, you will notice in comparing with last year that the total cost of cleaning catch basins this year was approximately the same. The number of catch basins cleaned was a little larger due to the additional catch basins constructed during the year, and the unit cost per catch basin was a trifle higher yet the number of cubic yards of dirt cleaned from the catch basins was considerably larger, thus making the unit cost per cubic yard of dirt cleaned from the catch basins much lower.

Nearly 1,200 cubic yards of dirt was cleaned from our catch basins during the year at an average cost of \$1.21 per cubic yard. In addition to doing this work the Elgin Auto Eductor has kept the business section of the city flushed about every other day during the summer months. It has done numerous other jobs such as flushing sewers, pumping out cellars, transporting water to the city quarry, hauling crushed stone, etc. During the recent flood of November 4, this piece of equipment worked day and night pumping cellars and flooded areas for several days. During the winter this same equipment is mounted with a "V" Type Sargent Plow and does duty plowing the streets during every snowstorm.

SEWERS

Construction.—During the last three years we have felt it advisable to do our sewer construction work during the winter months and in doing so we are not only able to keep our men employed a greater part of the year but we can actually construct our sewers at just as reasonable a cost and in some cases at a less cost than would be the case if the construction was done in the summer months. The extra cost of digging through the frost in winter is more than offset by the advantage of not having to shore up the sides of the ditches and not being hampered by ground water or muddy conditions which are sometimes costly when work is done in the summer months, especially where the sub-soil is of a clay or quick-sand nature. The sewers constructed during this year were as follows:

(a) Ferguson Avenue, from Foster Street to Briggs Street, 335 feet of 10-inch sewer.

(b) South Union Street, from Bradley Street northerly to the old ravine sewer, a distance of 179 feet, of 24-inch sewer. This job was necessary in order to eliminate the frequent overflow at this point dur-

ANNUAL REPORT OF STREET CLEANING DEPARTMENT FOR THE YEAR 1927
ELGIN No. 1

[illegible]

Mounted on White 5-Ton Truck

[illegible]

ing the heavy rain storms of the summer months. There was only an 8-inch sewer pipe originally laid in this section of the street.

(c) Fletcher Place, from a point near Colchester Avenue, northerly to a point near the old ravine, a total distance of 646 feet, a portion of this being 8-inch and the remainder 10-inch sewer.

The unit cost per lineal foot for the above jobs was \$2.68, \$7.53, and \$3.55, respectively.

SEWAGE TREATMENT PLANT

This plant was completed in April, 1927. It is located at the lower end of Fletcher Place and is used to chlorinate the sewage before it is allowed to pass into the open air and thence into the ravine.

Sewage Treatment Plant.—In addition to the above-mentioned construction of sewers we found it necessary after considerable study and investigation to construct a sewage treatment plant on Fletcher Place, the reason for this being that Fletcher Place is so much lower than Colchester Avenue that drainage could not be had into the Colchester Avenue sewer. A design was made in the office of the City Engineer

for this plant which will accommodate a maximum of 50 families, this being the maximum estimate of the number of families that can possibly be accommodated on this street and the proposed street leading off from Fletcher Place to the East, under ordinary housing conditions. The construction of this plant was done with Street Department employees, the construction consisting of two sedimentation tanks, a timing tank, and a small building in which to house the Wallace Tiernan chlorine machine. Only one-half of the number of sedimentation tanks planned for were constructed at this time but provisions were made to enable the other two tanks to be constructed as a continuation of this unit whenever the quantity of sewage reaches a point where the additional tanks are necessary. The operation of this plant is briefly outlined as follows:

The sewage passes through the regular sewer system into a man-hole near the plant from which it flows into the sedimentation tanks, provision being made so that during the heavy rain storms an overflow pipe will carry the excess rain water through this overflow directly into the timing tank instead of passing through the sedimentation tanks. The sewage passage through these two tanks, where the solid matter settles out, thence through a series of small pipes located near the top of the tanks into a trough or spout through which it is carried to the timing tank located in the small building or visible part of the plant. The sedimentation tanks are entirely under ground and reached through manholes at the top of each tank. The timing tank is of sufficient size to allow from 15 to 20 hours treatment of the sewage under ordinary flow and it is at this point that the sewage is treated with a mixture of liquid chlorine administered into the timing tank by an automatic chlorine machine which is manufactured by the Wallace-Tiernan Company of Newark, N. J. The sewage after having been treated then passes from the timing tank into a wooden trough or spout outside of the building through which it is carried to the ravine some fifty feet below. The total cost of the construction of this plant including engineering and supervision was \$2,365.67. The cost of the equipment including the chlorine machine, initial supply of chlorine and electric heater, etc., was approximately \$800. The plant has worked thus far very satisfactorily and I have no reason to believe but what it will operate just as satisfactorily for many years to come providing proper attention is given to the equipment. This system of treating sewage is being used to a great extent in many of the

larger cities where the effluent is discharged into streams which are used for water supplies. This system is found to be very satisfactory in large cities and is fast becoming a means by which cities can take care of isolated sections which they are unable to divert into the regular sewerage systems. Sooner or later Burlington will find it advisable to treat the city sewage before it is discharged into Lake Champlain and a plant of this general type but of course on a much larger scale, will probably be necessary for this treatment.

A number of manholes and catch basins were also constructed durshorten up the distance between manholes on some of our old sewer lines. A list of these manholes and catch basins and their location is as follows:

LIST OF MANHOLES 1927

Fletcher Place	1	At dead end near Colchester Avenue
Fletcher Place	1	350 feet north of No. 1 manhole
Fletcher Place	1	Near septic tank

There were fifty-three sewer connections made during the year.

Maintenance.—The general maintenance work of keeping our sewer system free of obstructions and sediment has taken considerable time during the year but as the work was all done with the aid of our Sewer Turbine Machine and the Elgin Auto Eductor the cost has been less than in some previous years. The fact that our catch basins are kept in a cleaner condition than was possible before we purchased the Elgin Eductor is one reason why our sewer maintenance work is somewhat less than it used to be. By taking the dirt out of the catch basins before they become overloaded keeps the sticks and débris from passing on into the sewer lines and thus eventually clogging the passage. Several old house connections which were constructed of tile and were giving trouble from tree roots have been dug up and replaced with iron pipe. This work is of a private nature yet of great importance to the Sewer Department and Street Department because each necessitates the digging up of the surface of the street and therefore the work has practically all been done by the Street Department forces and under the supervision of the City Engineer's office.

SPRINKLING

The only sprinkling which was done with water this year was that on the business streets and adjoining blocks where construction work was being done. The business section was also flushed with water about three times per week, a certain section being flushed each morning between the hours of four and seven o'clock.

Oiling.—Oiling has taken the place of water sprinkling and has been very beneficial to our streets. In all, we used approximately

80,000 gallons of Tarvia and asphalt road oils in surface treating our streets this year. The total cost of furnishing and applying this surface treatment together with the sprinkling and flushing with water was approximately \$10,000.

"OLD" POTASH BROOK BRIDGE

This picture shows conditions at Potash Brook during January, 1927, when winter construction work was being done. Note the general conditions as compared with the picture showing the completed job.

BRIDGES

Construction.—(A) The Potash Brook Bridge job which was started in December, 1926, was completed in the early part of the summer of 1927. The entire job was done with Street Department forces, who worked through the entire winter pouring concrete at zero temperature and working under many difficulties during the colder months. It was necessary to heat all of the aggregate used in the concrete mix and

cover sections of the structure as soon as they were poured, also keep live steam around these sections by means of a covering of canvas for at least 72 hours after the concrete had been poured. Strict inspection was kept on this job, especially during the actual placing of the concrete to see that no concrete was allowed to be placed which was

“NEW” POTASH BROOK BRIDGE

This picture shows the completed job including the new Concrete Culvert and the new fill which raised the grade of the road about three feet and widened it to about forty-two feet, between guard rails.

not of the proper mixture and also to see that proper temperatures were kept around the structure for a definite length of time after the concrete had been poured. Specimen concrete cylinders were made on the job for the purpose of testing the strength of the concrete. These specimens were tested in the laboratory at the University of Vermont and were found to be up to the standard requirement. The new shoulder or fill was made after the old structure had been torn

away and the grade of the road was raised approximately three feet above the surface of the old road. A gravel surface thirty feet wide was constructed on the new road bed and new gravel sidewalks five feet in width were constructed on each side of the road. A new concrete and steel-cable guard rail was constructed the entire length of

"NEW" POTASH BROOK BRIDGE

This picture shows the completed concrete bridge (or culvert) as it appeared in April, 1927. Note that the right wing wall of the old bridge had crumbled away and taken some of the pavement with it.

the fill on each side of the highway and two catch basins were constructed at the low point in grade directly over the new bridge to take care of the drainage at these points. The total cost of this job was \$20,527.01. Of this amount the State Highway Department paid \$5,000. As soon as the fill has settled sufficiently, a new pavement and new sidewalk should be constructed so as to close up the gap between

the state construction and the city pavement construction which now ends opposite the Home for Destitute Children.

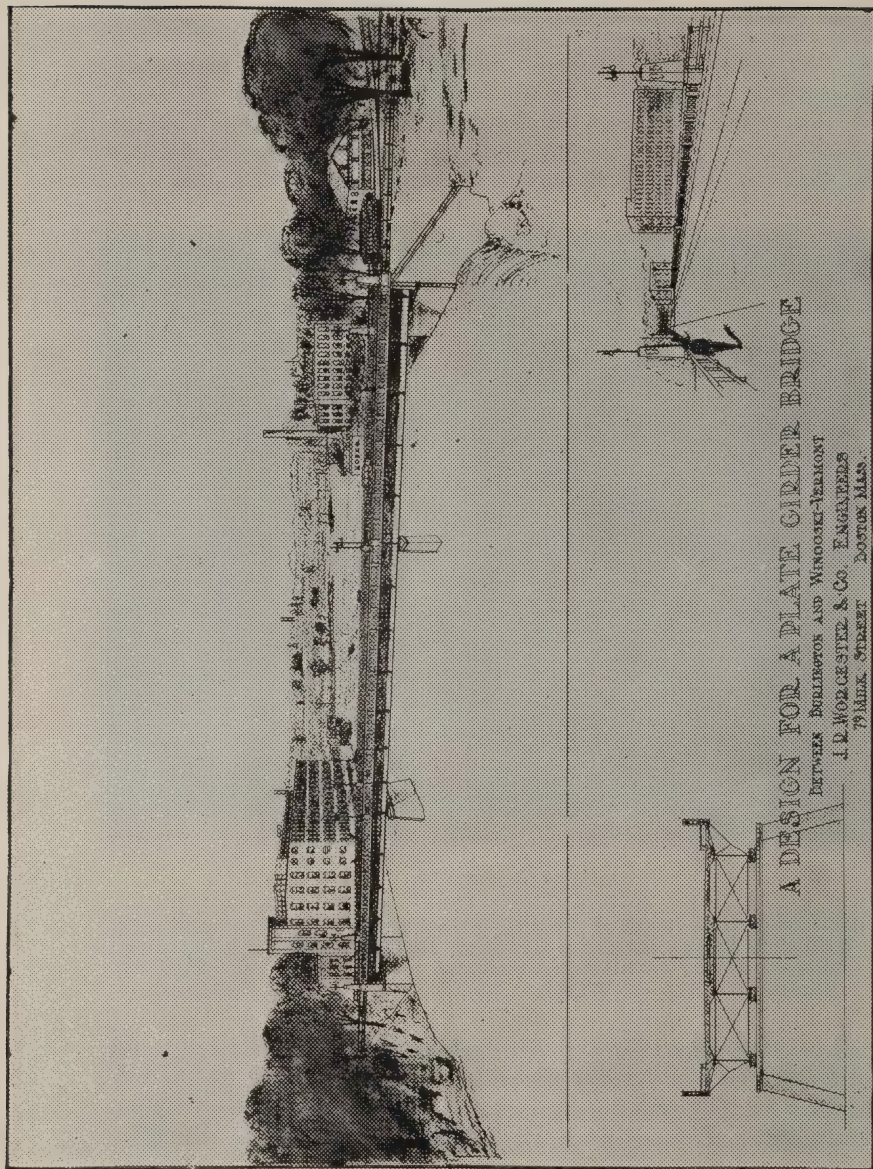

(B) The easterly wing wall of the Winooski Abutment on the Winooski River Bridge crumbled into the river during the high water period of the spring of 1927 and it was necessary to rebuild this wing

PONTOON BRIDGE

This bridge was installed by the U. S. Army Engineers from Fort Dupont, Delaware, on November 12, 1927, after the old steel bridge had been carried away by the flood of November 4th. Note the abutment of the old Winooski Bridge in the center of this picture.

wall in order to protect the Winooski approach. Plans were drawn in the office of the City Engineer as well as specifications for the construction of this work which included the extension of the old abutment about eighteen feet to the east and a wing wall from that point extending at a 45° angle in a northerly direction to the intersection of a retaining wall which had been constructed previously. This con-

A DESIGN FOR A PLATE GIRDER BRIDGE

BETWEEN DUBLINGTON AND WINOOSKI-VERMONT

J. R. WORCESTER & CO. ENGINEERS

79 MARK STREET BOSTON MASS.

The above sketch shows the proposed Winooski Bridge as designed by the J. R. Worcester Co., of Boston, Mass., plans for which are well under way. This Bridge will be constructed in 1928, the probable date of completion is estimated to be August 1, 1928.

struction was done under a "Cost Plus Contract" with Mr. Alexander Terrien, contractor. The total cost of this work was \$5,120.33. This included all of the construction materials and labor.

Maintenance.—Maintenance work of various kinds has been done on the several small bridges throughout the city. Such work included the replacement of stringers and planking, repair of guard rails and approaches, painting, etc. The cost of this work was approximately \$1,000.

Winooski River Bridge.—The Winooski River Bridge between Burlington and Winooski was washed away by the flood on November 4, and after investigations and reports had been made by various bridge committees appointed by the two cities and by the Chamber of Commerce, a contract was entered into with the J. R. Worcester & Company, designing engineers of 79 Milk Street, Boston, Massachusetts, to design the proposed bridge as recommended by the Bridge Sub-committee, also to prepare plans and specifications and contracts and to supervise the construction of this bridge. The plans are now being prepared and it is expected that they will be completed in time to let a contract and have the contractor at work on the job March 1, 1928. The total estimated cost of this new bridge is approximately \$200,000. The State Highway Department has set aside an appropriation of \$125,000 as a minimum appropriation toward the cost of this structure, the balance of the cost to be paid by Burlington and Winooski according to the ratio of their grand lists. It is expected that with good luck the structure should be completed ready for traffic about August 1.

SIDEWALK, CURBING AND GUTTERS

Construction.—The construction of sidewalk, curbing and gutters this year has been done with Street Department forces entirely. The total amount of work constructed was as follows: Sidewalks 14,775 lineal feet, curbing 6,448 lineal feet, and gutters 5,143 feet. The total cost of this construction was approximately \$20,000. This does not represent as large an amount of construction as was accomplished during the previous year, but our appropriation for this was decreased from approximately \$19,000 to \$10,000, but owing to the portion of this work which was assessed against the property owners we are able to

do the total amount as stated. A complete list of the several jobs with their location will be found in the report of the City Engineer.

We have already received petitions for work to be constructed in 1928 amounting approximately to \$35,000, therefore, if these petitions which have already been approved are constructed during the coming season the appropriation for this work will necessarily have to be increased.

Maintenance.—Considerable maintenance work has been done in the way of leveling or regrading old sidewalks and resetting old curbing where the roots of the trees or frost action has either warped the sidewalks or left the curbing out of alignment and grade. A great amount of work is necessary along this line in order to put our old sidewalks in good condition. This work should come first and it might even be wise for this department to set aside a certain portion of the sidewalks, curbing and gutter appropriation for maintenance purposes *only*, and a concerted effort made to do as much of this work as is possible during the coming year.

STONE QUARRY

The city stone quarry has been a source of considerable revenue during the past year because of the large amount of construction work which has been going on in the city. The total tonnage of stone quarried and crushed this year was 14,312 tons. This is approximately the same as the output of 1926. The value of this amount of stone computed from the different grades of stone and the different rates charged for these grades amounts to \$28,752.00.

Over 6,000 tons of stone were sold to private sales. The other 18,000 tons were used in the various branches of the Street Department and for several of the other city departments in the construction of their work. We have on hand in the city quarry at the close of the season, 575 tons of crushed stone of all sizes available for immediate delivery. We also have a goodly supply of broken stone ready for the crusher. The quarry has not been closed during the winter months as the demand for stone during the past few weeks has been large enough to warrant continuous operation of the quarry and at the same time give employment to many men who would otherwise have been laid off because of lack of work.

Plant and Equipment.—A small tool house has been added to the quarry plant this year for housing all small tools used in the quarry, which allows the machine shop and blacksmith shop to be used for their regular purposes. All equipment has been kept in first-class condition

INTERIOR OF POWER HOUSE AND SHOP AT CITY ROCK QUARRY

All drills are sharpened at this plant and all blacksmith and mechanical work in connection with the operation of the Rock Quarry is also done here.

and although for cost purposes we show a depreciation of 10% per year in our capital investment, as a matter of fact all of the equipment and plant will last for at least twice that length of time. A new and larger jack-hammer should be purchased for use in face drilling as the small hammers which we now have are too light for deep drilling. These could be used for the drilling of short holes on the shoulder of the quarry and for pop-holes. A small pipe line for water supply is still one of our greatest needs at the quarry as we are still being compelled to haul all of the water used for the cooling system and for drinking purposes from the city supply.

SNOW REMOVAL

Snow removal is as important a feature in keeping our roads and streets in condition for traffic in winter as maintenance of the road surface is in summer. With this fact in mind the Street Department has purchased a new "Model D" Fordson Tractor with full crawlers and equipped with an all steel "V" Type Sargent Snow Plow. This equip-

CITY ROCK QUARRY

The City Rock Quarry, a portion of which is shown in this picture, comprises six acres. The right of way leading from the Quarry to Williston Road is also a part of this property. More than 55,800 tons of stone have been quarried during the last five years.

ment has been used during several storms this season and has proved to be very satisfactory. This gives us three separate units with which to plow our streets and we find that we are able to cooperate with the adjoining towns in helping them to keep their roads open. An arrangement has been made with the Town of South Burlington and the Towns of Colchester and Milton through the District Highway Commissioner whereby the Street Department will attempt to keep certain roads plowed after each snow storm as soon as the streets of the city

have been put in condition. The charge made for this work has by agreement been set at \$5.00 per hour for either piece of equipment including one operator and one helper. This arrangement has worked to the satisfaction of both parties so far, but we have not encountered any extremely heavy storms thus far.

Snow Fence.—Several thousand feet of modern snow fence has been purchased and erected this year and we now have a total of approximately one mile of this type of fence. The results attained by the use of the snow fence is very remarkable. Places which have given us considerable trouble because of drifting snow during the previous years have been entirely free from snow this winter due to the use of the snow fence. This I believe is the cheapest method of snow removal that we can use for sections where heavy drifting occurs.

STREET PAINTING AND SIGNS

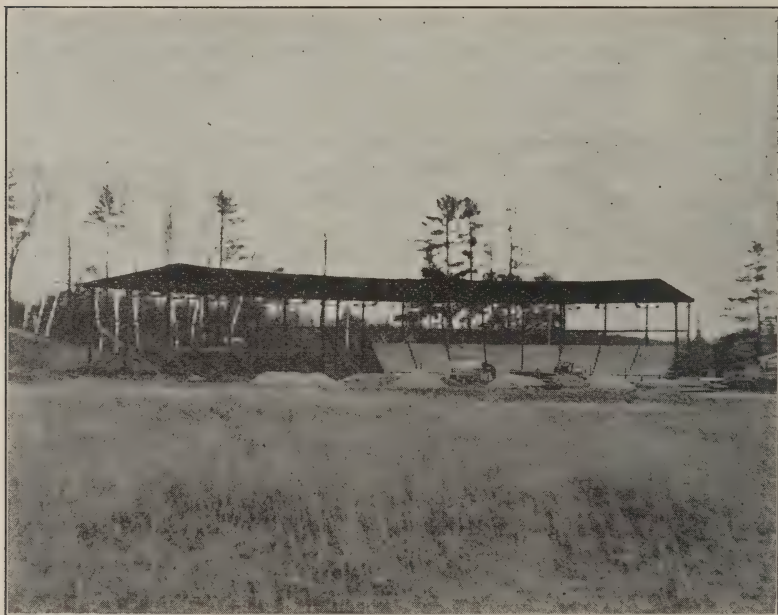

Painting.—The painting of our business streets setting off the parking areas and the non-parking areas, together with the marking of the center lines, dangerous curves, crossings, and stop signs at through traffic crossings has become quite a considerable task and each year the demands for this work increase tremendously. However, this is a feature of traffic control which is having very satisfactory results. The stop signs painted on our dangerous street crossings where two through traffic streets intersect has probably saved several bad accidents during the past season. More of these intersections should be marked off during the coming year and more strict adherence to the requirements of traffic at these particular points should be emphasized.

Signs.—Street signs and traffic direction signs as well as danger signs have been erected in several sections of the city during the past year which have been an aid to the traveling public. More of these signs should be erected each year. The signs erected at our through traffic streets are not too expensive and I believe have worked out to the advantage of the traveling public. More of these signs could be erected each year as the demand increases, until we have a complete system of "STOP" and "SLOW" signs wherever crossing or entering a through traffic street. I believe this effort is well worth while.

MISCELLANEOUS

New Central Fire Station.—The retaining walls and pavement for the rear entrance to the new Central Fire Station were completed

during the early spring months and an iron pipe railing on the top of the retaining wall for protection. The contract for the retaining walls and paving was with Victor Bergeron and F. S. Lanou & Sons contracted for the guard rails. This work was all designed by the City Engineer and constructed under his supervision. The back fill-

SOUTH PARK BASEBALL GRAND STAND

This picture shows the portion of the work completed on November 1, 1927. The seating capacity of this stand when completed will be about 1,200.

ing around these retaining walls and the pouring of the asphalt joint filler was done by Street Department labor.

Memorial Auditorium.—A considerable amount of work was done by Street Department labor in connection with the grounds of the Memorial Auditorium. The sewer system leading from the Auditorium into the ravine sewer was constructed and a wooden crib retaining wall with iron pipe railing was constructed along the westerly property

line. The old buildings purchased from Dr. W. G. E. Flanders were torn down and removed from the premises and a drainage system was constructed for draining the rear end of this lot.

City Hall.—During the construction of the City Hall the Street Department did considerable work in connection with the grading of the grounds, including the installation of four drainage basins and sodding a large portion of the grass plots and removing two trees which were in the way of construction at the front entrance.

South Park Baseball Grand Stand.—Considerable work has been done by the Street Department during the latter part of the summer for the Park Department in developing South Park and constructing the new Baseball Grand Stand. The concrete piers for the Grand Stand were constructed in the early part of August and considerable grading was also done at this same time as well as the extension of the drainage system and the construction of several catch basins. Owing to the delay caused by the strike in the Steel Shops the Eastern Bridge & Structural Company who had the contract for furnishing and erecting the steel portion of the Grand Stand were unable to do their part of the work until late in the fall. After they had completed their work the Street Department put their forces at work setting the forms for the concrete seats and parapet walls and also constructing the wooden portions of the roof. The A. C. Hathorne Company laid the Barrett Specification Roofing. Because of the delay caused by having to use the men for other work during the flood and because of the lateness of the season it was deemed advisable to postpone the concrete construction until next spring. The materials for the concrete, however, had already been delivered to the site and the form work for a little more than one-half of the entire structure had been completed. The remainder of the structure will be completed during the early summer months and we hope to have the Grand Stand completed ready for use for the summer baseball season.

Equipment.—The equipment of the Street Department has been maintained in a proper manner and a few pieces of small equipment have been added from time to time during the year. The most important pieces of new equipment being a full crawler Fordson Tractor of the Model D Type, together with an all Steel Sargent Snow Plow. Another small piece of equipment which, although inexpensive, saved the Street Department a considerable amount of money was the "Goroco Chip Spreader." This Chip Spreader was used principally to

spread sand over the surface treated streets as they were being treated with Tarvia or Asphaltic Road Oils. This little machine did a tremendous amount of work in a very satisfactory manner and more than paid for itself during this one season. With proper maintenance this machine will last for several years.

MUNICIPAL ASPHALT PLANT

This Asphalt Plant was purchased and erected in June, 1924, on the City Dock near the Elias Lyman Coal Sheds. All asphalt mixtures including cold patch materials are mixed at this plant.

Plant.—The only alterations or additions made to our plant during the past year were an addition of a small tool house at the Rock Quarry for storing small tools and quarry equipment and the addition of a storehouse at the Asphalt Plant, primarily for storing the steam rollers during the winter. This storehouse, however, was constructed large enough to allow for the storage of other small equipment in addition to the rollers.

Aviation Field.—The work on the Aviation Field was done by the Street Department under a special appropriation for this work. This work included the clearing of the trees and removing the stumps of numerous trees located at the central part of the landing field, the laying out of the circle and the erection of a cone, also a small amount of grading. It is expected that the Street Department will also clear a section of the wooded lands during the coming winter months and thus add to the landing facilities of the Aviation Field.

CONCLUSION

Although the money expended during the year is much less than that of the previous year the difference is practically the amount of the Bond Issue for last year and as that was the last year of our five-year program for Bond Issue Permanent Street Construction we were unable to do any asphalt work this year. We did, however, do considerable penetration asphalt macadam work which compensated for this lack of funds and we were able to accomplish a considerable amount in terms of square yards for the money available for this work. This in part was due to the fact that we manufactured our own crushed stone and only had to purchase the asphalt material for this type of work. This gave the department a chance to construct several sections of streets which had needed attention for some time, but because of our other more urgent program had been unable to attempt. There are many things on our proposed plans which we have been unable to carry out, due to either lack of funds, lack of time or some other reason. We feel, however, that we have accomplished a vast amount of work in all branches of our department and we have tried to the best of our ability to get value received for every dollar of money expended. In prosecuting our work and attempting to carry out our program we have had at all times the hearty cooperation of the various City Officials and Departments as well as the organized effort of the Street Department as a whole. I wish to take this opportunity of expressing my appreciation to all those who have so generously contributed to the successful year of the Street Department.

Respectfully submitted,

GEO. C. STANLEY,

Superintendent of Streets.

REPORT OF THE CITY ENGINEER

To the Honorable City Council:

GENTLEMEN:—I hereby submit my report as City Engineer for the year ended December 31, 1927.

SURVEYS

Surveys have been made in connection with laying out the new city buildings and their adjoining sidewalks and curbs, as well as other construction incidental to these buildings. Surveys have also been made of certain city lots and some of these have been newly monumented. Several street monuments have been set during the year and proper record has been made in the official monument book in the office of the City Engineer. All requests for street lines and grades have been given in a proper manner regardless of whether the work for which the lines or grades were given was City work or private work. Whenever called upon by any of the several City Departments to do surveys or any other work of an engineering character, the request has been granted. Street lines have been given in all cases where new buildings or residences have been built. These lines have always been given before the permit has been granted by the Building Inspector and a record of such survey has been plotted on the permit and made a part thereof.

DESIGNS

Designs of all street pavements of various types have been made a matter of record in the City Engineer's office as well as designs of all construction work connected with this office. One of the most important construction jobs of the year was the construction of the Sewage Treatment Plant on Fletcher Place, the design of which was entirely original and designed in the office of the City Engineer.

INSPECTION

The inspection of all construction done by the Street Department is carried on under the direction of the City Engineer. All street cuts

REPORT OF THE CITY ENGINEER

To the Honorable City Council:

GENTLEMEN:—I hereby submit my report as City Engineer for the year ended December 31, 1927.

SURVEYS

Surveys have been made in connection with laying out the new city buildings and their adjoining sidewalks and curbs, as well as other construction incidental to these buildings. Surveys have also been made of certain city lots and some of these have been newly monumented. Several street monuments have been set during the year and proper record has been made in the official monument book in the office of the City Engineer. All requests for street lines and grades have been given in a proper manner regardless of whether the work for which the lines or grades were given was City work or private work. Whenever called upon by any of the several City Departments to do surveys or any other work of an engineering character, the request has been granted. Street lines have been given in all cases where new buildings or residences have been built. These lines have always been given before the permit has been granted by the Building Inspector and a record of such survey has been plotted on the permit and made a part thereof.

DESIGNS

Designs of all street pavements of various types have been made a matter of record in the City Engineer's office as well as designs of all construction work connected with this office. One of the most important construction jobs of the year was the construction of the Sewage Treatment Plant on Fletcher Place, the design of which was entirely original and designed in the office of the City Engineer.

INSPECTION

The inspection of all construction done by the Street Department is carried on under the direction of the City Engineer. All street cuts

whether made by the Street Department, or otherwise, have been inspected in the same manner as prescribed by the Ordinance for Street Openings. The number of permits granted for opening the streets during the past year, together with their classification, are as follows:

Number permits for new gas services	92
Number permits for repairs to gas main and services	51
Number permits for new water services	37
Number permits for repairs to water mains and services	28
Number permits for repairs to sewer mains and connections	12
Number permits for sewer connections	53
Number permits for new gas, water and sewer mains	13
Number permits for miscellaneous work	29

Total number of permits issued 315

From the above list of permits it can readily be seen that an enormous amount of maintenance work is made necessary each year because of street cuts. The average street cut covers about three square yards and costs about one dollar per square yard to resurface.

SIDEWALK, CURB AND GUTTER CONSTRUCTION

All engineering work in connection with sidewalks, curb and gutter construction including the setting of lines and grades, and plotting of maps for assessment purposes has been properly executed and records made of construction costs. A list of all jobs giving location and extent of each is as follows:

Street and location	Lin. ft. sidewalk	Lin. ft. curbing	Lin. ft. gutters
Summit St.—Both sides—Maple to Cliff....		865.2	892.2
S. Prospect St.—West side—Maple to Cliff..	1,516.7	505.75	495.6
S. Union St.—West side—Front of 493-515..	260.5		
St. Paul St.—East side—Main to King.....	81.5		
School St.—East side—Loomis to North...	574.1		
George St.—West side—Monroe to Peru...	380.		
Interval Ave.—West side—Archibald to Spring	587.16		
Loomis St. —South side—Isham to Greene.	172.0		

Street and location	Lin. ft. sidewalk	Lin. ft. curbing	Lin. ft. gutters
Wilson St.—Both sides—Prospect to Mansfield Ave.	910.	754.	754.
S. Champlain St.—East side—Main to College	355.2		
Mansfield Ave.—West side—Loomis St. southerly	864.2		
Spring St.—Both sides—Interval Ave. to N. Bend	1,445.33		
Spruce Ct.—Both sides—Spruce St. to end. .	549.88		
N. Prospect St.—West side—Henry to North Grove St.—Both sides—Chase St. southerly	153.2	139.4	139.4
Colchester Ave.—East side—Chase St.—Green Mt. Cemetery	1,202.60	1,240.2	
Hayward St.—Both sides—Catherine southerly	400.	77.5	
North Ave.—East side—North to Front....	818.92	818.92	813.92
Grant St.—North side—Union to Winooski Ave.	601.		
Pomeroy St.—Both sides—Willard to Hyde	223.5		
N. Prospect St.—West side—Henry to Brookes Ave.	579.5	473.	473.
Chase St. Ext.—Grove St. to end.....	545.	124.3	124.3
Private work—Various locations	640.	640.	640.
	1,574.65	810.5	810.5
Total	14,774.74	6,448.74	5,142.92

A tabulation of various types of sidewalks, curbing and gutters also crossings has been prepared and is found to be as follows:

Character of Work	No.	Total in miles
Length of walk flagged and curbed with stone.....		2.958
Length of tar concrete walk curbed with stone.....		14.806
Length of earth or gravel walk curbed with stone...		4.517
Length of tar concrete walk without curb.....		1.205
Length of cement walk and curb.....		3.614
Length of cement curb.....		18.009
Length of cement gutter.....		40.359

Number of cement crossings.....	25
Number of brick crossings.....	19
Number of tar-concrete crossings.....	76
Number of stone crossings.....	140
Number of sewer connections since 1887.....	2,804

SEWERS

All engineering work in connection with sewer construction has been properly done and records of all such work have been made and filed for future reference. A complete list of all sewers in the city including those constructed during 1927 is as follows:

Size	Vitrified Monolithic					Total
	Cement feet	Brick feet	pipe feet	concrete feet	Stone feet	
6-inch			1,783			1,783
8-inch	365		27,285			27,650
10-inch			26,391			26,391
12-inch	9,273		71,275			80,548
15-inch		976	17,643			18,619
18-inch	2,713	1,788	12,599			17,100
20-inch			2,273			2,273
24 inch	360	1,748	3,868			5,976
30-inch		2,621				2,621
36-inch		5,025		55		5,080
36x48-inch					1,600	1,600
48-inch		1,048				1,048
60-inch		125				125
72-inch		600				600
Totals	12,711	13,931	163,117	55	1,600	191,414

The total length of sewers is equal to 36.252 miles.

MAPS AND RECORDS

Maps and records of all construction work, house number maps, assessment maps, etc., have been completed to date and all have been blue printed or photostated so as to give us copies of the entire list. The originals have been filed in the metal file in the fire-proof vault

and the copies are filed in the plan file in the office of the City Engineer for ready reference. The Construction Map of the City of Burlington which forms a part of this report shows in color scheme and by legend the current construction for 1927.

BRIDGES

In accordance with an ordinance relating to the inspection of culverts and bridges, I have inspected all bridges and culverts as required and reports on same have been submitted to the Board of Street Commissioners and the Board of Aldermen for their consideration. In connection with the proposed Winooski Bridge, the City Engineer has been required to make certain surveys and soundings from which a location plan, a profile and a set of cross-sections were made for use of the designing Engineers, J. R. Worcester & Co., of Boston, Massachusetts. Test pits and borings have also been made and samples of rock and soil have been taken for test purposes. Directly after the flood of November 4, which carried away the old steel truss bridge, the City Engineer spent considerable time with other Engineers in studying and investigating different proposed bridges after which a report was made by the Bridge Sub-committee of which the City Engineer was a member, recommending a definite type of constructoon.

HOUSE NUMBERING

The house numbering map has been kept up to date and photostat copies of originals have been made for field use. The total number of permits for new house numbers was forty-eight.

GLEBE LANDS

There has been some difficulty in being able to definitely locate the "Glebe" lands so-called, and in order to clear up the situation whereby Engineer was empowered to draw up a set of maps and plans whereby these lands could be very closely identified. This work is being done during the spare time and when completed will be of very great assistance to the Assessors and City Treasurer in making out their tax bills.

Respectfully submitted,

GEO. C. STANLEY,

City Engineer.

REPORT OF THE FIRE COMMISSIONERS

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—In compliance with the City Ordinance we beg to submit the Fire Commissioners' report for the year ending December 31, 1927, as follows:

Appropriation awarded	\$ 65,000 00
Credit by sales	332 91

Total receipts	\$ 65,332 91
----------------------	--------------

Expenditures

Pay rolls	\$ 57,052 59
Operating expenses	10,257 84

Total expenditures	\$ 67,310 43
--------------------------	--------------

Making an overdraft of	\$ 1,977 52
------------------------------	-------------

For an itemized account and the working of this department we would refer you to Chief Engineer Stockwell's report, the recommendations of the same are much needed to render better service.

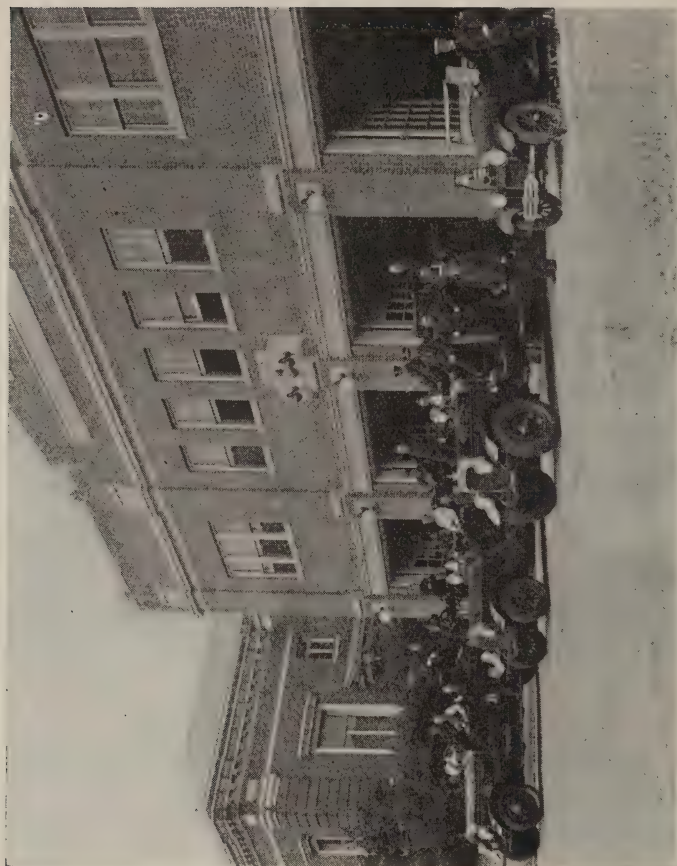

With grateful appreciation for the cooperation and support given this department, this report is respectfully submitted.

F. E. MORGAN,

G. D. McBRIDE,

J. H. MIDDLEBROOK,

Board of Fire Commissioners.

NEW CENTRAL FIRE STATION No. 1

SIXTY-SECOND ANNUAL REPORT

OF THE

CHIEF ENGINEER FIRE DEPARTMENT

To the Honorable Board of Fire Commissioners of the City of Burlington:

GENTLEMEN:—According to the City Ordinance I have the honor to submit to you the sixty-second annual report of the Fire Department of the City of Burlington for the year ending December 31, 1927.

MANUAL FORCE

The manual force consists of thirty-seven permanent men, one chief engineer, one assistant engineer, three captains, six chauffeurs and twenty-six hose and ladder men.

HOUSES

The City owns four fire houses, Fire Headquarters (Central Station) South Winooski Avenue, with offices of chief engineer, assistant chief engineer, also the new Gamewell Fire Alarm room and apparatus.

Station No. 2, 120 N. Champlain Street.

Station No. 3, 16 Mansfield Avenue.

Station No. 4, S. Union Street.

APPARATUS

The department has in service for extinguishing fires:

Central Station No. 1. Two Seagrave 750-gallon pumps, 130 horse power, with 80-gallon tank for booster pump. Twelve hundred feet (each) of two and one-half inch regulation double jacket rubber-lined hose, one Seagrave tractor-drawn 85-foot aerial hook and ladder truck, the main stick being 45 feet long, with an extension of 40 feet, so when extended it reaches a height of 85 feet. On main stick is mounted a Morse ladder pipe and fifty feet of three-inch double jacket rubber-lined regulation hose with two-way "y," meaning that ladder can be used as a water tower. There is also three hundred and sixty feet

of ladders, including extension wall and roof, pike poles, plaster hooks, door opener and large pull-down hook with chain and rope, all necessary tools and equipment.

Station No. 2. One American LaFrance auto combination, Type 5, No. 10, with one 40-gallon chemical tank and two hundred and fifty feet of chemical hose, eight hundred and fifty feet of two and one-half inch regulation double jacket rubber-lined hose, one Draeger smoke protector and all necessary tools and equipment.

Station No. 3. Has one Selden combination auto truck with one 40-gallon chemical tank, two hundred feet of chemical hose, two thousand feet of two and one-half inch regulation double jacket rubber-lined hose, one Hart turrit pipe mounted on body and all necessary tools and equipment.

One chief's car which is housed at old Fire Station No. 5, S. Union Street, with one Draeger pulmotor.

One Ford one-ton truck at Central Station.

The department has in reserve one two-horse drawn Seagrave city service hook and ladder truck with three hundred and twenty feet of ladders, sixty-five feet the longest.

FIRE ALARM SYSTEM

The fire alarm system is of the Gamewell make and is located at the new Central Station in two separate fireproof rooms and consists of the following: Two six-circuit central office type storage battery switchboards mounted on angle iron frames with lower panels, kick plates and slate shelves, one fourteen-circuit protector board mounted on angle iron frame with lower panel, kick plate and slate shelf. One recording set consisting of one Excelsior punching register, one Excelsior time and date stamp with clock, one Peerless take-up reel, one slate shelf with brackets, one Excelsior transmitter in one hundred wheel case, one hundred transmitter wheels, one fast and slow transformer, one art metal pedestal for same, mahogany finish, one six-circuit repeater, mounted on one art metal pedestal, two one hundred twenty-four inch shelf metal battery racks, two hundred and sixty-two F. I. P. battery, one motor generator control panel for controlling motor generator set, one motor generator, two forty-wire entrance cabinets, four engine house recording sets, each consisting of one Excelsior punching register, one Peerless take-up reel, one oak shelf with brackets, four

ten-inch turtle gongs for engine houses, four six-inch turtle gongs at Central Station, four engine house transfer switches, for sixteen-inch gongs for slow time, eighty street boxes, fifty-four miles of aerial wire, one mile of underground cable, two street sirens.

HOSE

The department has on hand nine thousand five hundred feet of two and one-half inch double jacket rubber-lined regulation hose, of this, six hundred feet is in poor condition, nine hundred feet of three-quarter inch chemical hose, fifty feet of three-inch double jacket rubber-lined regulation hose in good condition.

ALARMS

During the year your department has responded to two hundred and forty-nine alarms, an increase of four over the past year. The department responded to eighteen requests for assistance from other towns and cities, thirteen times to South Burlington, three times to Town of Colchester, once to Essex Center and once to the City of Winooski.

COST OF MAINTAINING THE DEPARTMENT

The cost of maintaining the department the past year was \$67,310.43. Salaries \$57,052.59, fuel \$3,381.36, gasoline \$740.55, lights \$518.46, laundry \$224.05, water \$108.30, telephones \$397.47, chemical hose \$75.00, uniforms \$1,562.68, fire alarm boxes \$423.02, licenses \$65.00, repairs and supplies \$2,761.95, the appropriation was \$65,000.00, supplies sold \$332.91, overdraft \$1,977.52.

REMARKS

The insurance paid according to the reports received from insurance companies for fires in your City the past year was \$59,940.07, of this amount there was paid \$1,563.75 in losses that the department knew nothing of. The department responded to four more alarms than last year and the largest number in the history of the City. The insurance losses paid was \$1,421.24 less than the year 1926. The department did remarkable work the past year, especially at the fires of the J. E. Booth Lumber Co. on April 11th, Spear Bros. mill, April 16th, Green Bros. Block on Church Street, May 5th and the Chace Cotton Mill on August 21st.

On March 1st engine companies No. 1 and 2 with their apparatus, and Ladder Truck No. 1 with company was transferred from Fire Headquarters and Station No. 3, to the new Central Station, 137 South Winooski Avenue. This station is one of the most up to date fire stations in New England, and is located on city land where the old City Market building stood. The building is 65 feet 6 inches wide and 88 feet 7 inches deep having four-door entrances. The fire alarm and battery rooms are located on the main floor in the southeast corner of building and are constructed according to the rules and regulations of the New England Fire Insurance Exchange; these rooms being fireproof. The second story consists of one large recreation room, toilet and shower bath rooms, large clean up room, kitchen and pantry, wide corridors, fourteen sleeping rooms (2 men in each room), office of chief engineer, office of assistant chief engineer and captain. There are four sliding poles. The basement is large and commodious and is entered from Main Street driveway, at west end of basement is a large hose drying rack 60 feet long by 10 feet wide, reloading, washing and repairs to apparatus are all done on this floor. There is also a work shop, stock room, coal pocket and large boiler room.

RECOMMENDATIONS

I recommend that the City purchase another 750-gallon auto pumping engine with booster tank to take the place of the American LaFrance combination truck which has been in service since February 13, 1913.

I recommend that the department purchase 1,000 feet of fire hose each year.

I recommend that a special appropriation be made so as to enable the department to purchase wire and cross arms so that all aerial fire alarm wire may be changed from the top gain of pole to lower, so as to conform with the recommendations of the Public Service Commission.

I recommend that five fire alarm boxes be purchased, and be installed on the following streets: Corner of Pine and Cherry Streets, corner of Hyde and North Streets, corner of Pearl and Williams Streets, corner of Pine and Lyman Avenue, corner of North Willard and Pomeroy Streets.

I recommend that the Board of School Commissioners purchase and install a fire alarm box in each school building.

CENTRAL STATION, LOCATED SO. WINOOSKI AVENUE

FIRE HEADQUARTERS

CARL D. STOCKWELL, Chief.

REPORT OF THE
FIRE WARDEN

To the Honorable City Council of the City of Burlington:

GENTLEMEN:—I have the honor herewith to submit the annual report of the Fire Warden for the year ending December 31, 1927, being a complete report of inspection made of property and surroundings.

The mercantile districts inspections have been made once each week. The outer districts have been thoroughly inspected.

Complaints promptly attended to and accurate records kept of same.

There have been two thousand eight hundred inspections made during the year.

In conclusion I extend my thanks to his Honor, Mayor Clarence H. Beecher, the Board of Aldermen and deputies for the favorable response to such requests as I have made from time to time and to all others who have in any way assisted me in my duties in this office.

Respectfully submitted,

CARL D. STOCKWELL,

Fire Warden.

REPORT OF THE
WIRE INSPECTOR

Burlington, Vt., January 10, 1928.

To the Honorable Mayor and Board of Aldermen:

GENTLEMEN:—I herewith submit to you my annual report as Wire Inspector for the year ending December 31, 1927, as follows:

Number of wiring permits granted 142

Number of service and meter permits granted 75

Total 217

Number of inspections for year 316

In closing I wish to call your attention to a former recommendation in regard to the licensing of all competent wiremen, thus doing away with much hazardous wiring that does not get to the attention of your Inspector.

For the courteous treatment that I have received during the year, I wish to tender my thanks.

E. K. PRESSEY,
 Wire Inspector.

REPORT OF THE

BUILDING INSPECTOR

To the Honorable City Council:

I beg to submit herewith my report as Building Inspector for the year 1927. Regular inspection has been made of all buildings under construction or alteration. I would recommend that the necessary ordinances be enacted to regulate the distance from the street line various classes of buildings may be erected. On page 260 is given a summary of the year's building operations in detail.

Respectfully submitted,

R. L. SOULE,
Building Inspector.

January 10, 1928.

REST ROOM

To the Honorable City Council of Burlington:

GENTLEMEN:—This the fifteenth year of the existence of the Rest Room for women and children has been one of continued success. An average of over one hundred persons per day use the rest room. During the Christmas shopping weeks an average of over five hundred called daily.

The matron and the Rest Room Committee are constantly receiving words of praise and appreciation from visitors who have found the rest room a great convenience.

This institution has become one of the City's necessities.

The Committee ask your continued interest.

Respectfully submitted,

MRS. E. D. WORTHEN,
President Rest Room Association.

Burlington, Vt., February 9, 1928.

Annual City Election

WARNING

THE LEGAL VOTERS OF THE CITY OF BURLINGTON, VERMONT,
ARE HEREBY NOTIFIED AND WARNED TO MEET IN
ANNUAL CITY MEETING ON

TUESDAY, THE SIXTH DAY OF MARCH, A. D. 1928

at 6 o'clock in the forenoon, in their respective Wards, at the several voting places hereinafter named, for the purpose of electing in:

WARD ONE—One Alderman and Ward Officers, and in

WARD TWO—One Alderman, one School Commissioner for unexpired term, Dr. T. S. Brown resigned, and Ward Officers, and in

WARD THREE—One Alderman and Ward Officers, and in

WARD FOUR—One Alderman and Ward Officers, and in

WARD FIVE—One Alderman, one School Commissioner and Ward Officers, and in

WARD SIX—One Alderman, one School Commissioner and Ward Officers.

All Ward Officers are to be elected for the term of one year, all Aldermen for the term of two years, and all School Commissioners for the term of three years, excepting School Commissioner in Ward II.

Also upon the petition addressed to me as Mayor, signed by more than thirty voters, the legal voters of said City are hereby notified and warned that the following Article is submitted to them at said Annual City Election to be voted on by ballot, namely:

Shall the real estate owned and occupied by the DeGoesbriand Knights of Columbus Home Association of Burlington, Vermont, Inc., located on the southwesterly corner of College and South Champlain Streets and used exclusively for the purposes of said Home Association, be exempted from taxation for a period of ten years?

The following are designated as Election Precincts, viz.:

In WARD ONE—At Fire Station No. 3, Mansfield Ave.

In WARD TWO—At 138 N. Winooski Ave.

In WARD THREE—At Fire Station No. 2, 120 N. Champlain St.

In WARD FOUR—At Van Sleet's Garage, 9 Strong St.

In WARD FIVE—At State Armory, 124 Cherry St.

In WARD SIX—At Fire Station No. 5, 469 S. Union St.

The Polls open at 6 o'clock in the forenoon and close at 3 o'clock in the afternoon.

CLARENCE H. BEECHER, M. D., Mayor.

Burlington, Vt., February 17, 1928.
